I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors

- a. Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the Fund's objective will be achieved.
- b. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
- c. Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not guarantee the future performance of the scheme(s) of the Mutual Fund.
- d. State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs towards setting up of the mutual fund.
- e. SBI Debt Fund Series (SDFS) is only the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- f. The NAV of the Schemes' Units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.
- g. The present scheme is not a guaranteed or assured return scheme.
- h. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

2. Scheme-specific Risk Factors

- a. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the SID & SAI.
- b. Redemption by the Unit Holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise.
- c. The tax benefits described in Statement of Additional Information (SAI) are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each investor / Unit Holder is advised to consult his/her/its own professional tax advisor.
- d. Investors in the Scheme are not being offered any guaranteed / assured returns.
- e. SBI Debt Fund Series (SDFS) will be investing in debt instruments (rated not below AA or equivalent), Government Securities and money market instruments (such as term/notice money market, repos and reverse repos). Trading volumes and settlement periods inherently restrict the liquidity of the scheme's investments. In the event of a restructuring of the scheme's investment portfolio, these periods may become significant.
- f. The Mutual Fund is not assuring any returns nor is it assuring that it will make periodic distributions. All dividend distributions are subject to the investment performance of the scheme.
- g. Different types of securities in which the scheme would invest as given in the SID carry different levels of risk. Accordingly the scheme's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risk than bonds, which are AA rated.
- h. No person has been authorized to issue any advertisement or to give any information or to make any representations other than that contained in this SID. Circulars in connection with this offering not authorized by the Mutual Fund and any information or representations not contained herein must not be relied upon as having been authorized by the Mutual Fund.
- i. Debt & money market securities investments under the scheme may also be subject to the following risks:
 - I. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.

- II. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- III. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
- IV. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- j. **Securitized debt investments under the scheme may also be subject to the following risks:**
- **Liquidity risk:** There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.
 - **Limited Recourse:** The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.
 - **Delinquency and Credit Risk:** Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly Investor Payouts to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle/ Asset. However many factors may affect, delay or prevent the repossession of such Vehicle/Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle/Asset may be sold may be lower than the amount due from that Obligor.
 - **Risks due to possible prepayments:** Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.
 - **Bankruptcy of the Originator or Seller:** If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme(s) and individual Plan(s) under the Scheme(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme(s)/Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme(s)/Plan(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. C. INVESTMENT OBJECTIVE OF THE SCHEME

To provide regular income, liquidity and returns to the investors through investments in a portfolio comprising of debt instruments such as Government Securities, AAA/AA+ Bonds and Money Market Instruments normally maturing with the maturity of the scheme.

D. SCHEME ASSET ALLOCATION

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Government of India dated Securities and Treasury Bills and Money Market instruments	80%	0%	Low
AAA/AA+ Bonds/Debt Instruments	100%	20%	Low to Medium
Securitized Debt	Upto 20% of the exposure to AAA/AA+ Bonds		Medium

The portfolio allocation indicated above would be applicable to all the Funds of various maturities launched under the scheme. Individual Funds under every series will try to match the residual maturity with the investment portfolio maturity of the Fund.

The Scheme / Plans shall not invest in derivative products.

The Scheme / Plan shall not make any investment in ADRs / GDRs / Foreign Securities and also shall not engage in stock lending.

The proportion of each of the Fund portfolio invested in each type of security will vary in accordance with economic conditions, interest rates, liquidity and other relevant considerations, including the risks associated with each investment. Performance of the scheme will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions.

Individual Funds may also enter into repurchase and reverse repurchase obligation in all securities held by it as per the guidelines and regulations applicable for such transactions.

The above investment pattern is indicative and may be changed by the Fund Manager for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable SEBI (Mutual Funds) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit Holders. Review and rebalancing of the portfolio will be done when the asset allocation falls outside the range given above. If the exposure falls outside the above mentioned asset allocation pattern, it will endeavour to restore within reasonable time depending upon the maturity of each fund. The scheme does not intend to invest in securities that are issued by a State Government or are supported by Sovereign guarantees. The funds raised under the scheme shall be invested only in transferable securities as per Regulation 44(1), Schedule 7 of the SEBI (Mutual Funds) Regulations, 1996.

The Mutual Fund reserves the right to suitably alter the frequency of the dividend payments under the various Funds introduced under various Series depending on the performance and any change in the tax laws.

There can be no assurance that the investment objective of the scheme will be achieved. However, the scheme will largely invest in bonds/debt instruments of reputed and sound companies and Government Securities in accordance with the investment pattern stated above.

E. TYPE OF THE INSTRUMENTS IN WHICH SCHEME WILL INVEST

Government of India dated Securities, Treasury Bills, Money Market instruments, Bonds/Debt Instruments including Securitized Debt.

F. INVESTMENT STRATEGIES

SBI Debt Fund Series is a Close-ended Debt Scheme and the objective is to provide regular income, liquidity and returns to the investors through investments in a portfolio comprising of debt instruments such as Government Securities, AAA/AA+ Bonds and Money Market Instruments

Upto 80% in Government of India dated Securities and Treasury Bills and Money Market instruments, 20-100 in AAA/AA+ Bonds/Debt Instruments and Upto 20% of the exposure to AAA/AA+ Bonds in Securitized Debt.

Investments would be made in securities of the highest short term rating for short duration series and also in securities of rating AA+ and above for long duration series. The scheme has the flexibility to invest in the entire range of debt instruments and would seek to minimise interest rate risk while avoiding credit risks.

G. PLANS

N. DEBT MARKET IN INDIA

The debt market is active since the mid 1990s as prior to it was a captive market-SLR requirement by Banks. This market was predominantly gilt oriented, until corporate papers became a part of it since late 1990s. The money market in India consists of the following instruments; treasury bills, commercial papers, certificates of deposits, short Non-Convertible Debentures-fixed and floaters and term lending instruments. The debt market consists of gilts, corporate debt papers and other approved securities (government guaranteed papers). The nature of instruments is in the form of plain vanilla bonds, floaters, zero coupon bonds-deep discounted bonds, securitized papers and structured debt papers. The Wholesale Debt Market segment is available both at National Stock Exchange (NSE) and The Stock Exchange, Mumbai (BSE). The players in Indian debt market are commercial banks, mutual funds, financial institutions, insurance companies and others. The retail secondary debt market is absent in India. The Reserve Bank of India has recently introduced an Online Market (OM) dealing platform for gilts. This is at present available to all participants who have a direct SGL with RBI. At present, the average daily turnover on NSE WDM is around Rs.1000 crore and further Rs.3000 crore in OM. The corporate debt market is a telephone market with the listed securities alone getting reported to NSE after the deal. The derivative market is Over the Country and is dominated by the Interest Rate Swaps. The likely yields of various instruments mentioned above, and the factors affecting prices of such securities are given hereunder:

The shorter term money market instruments currently offer yields between 9% to around 11% depending on tenor to maturity. The 2-3 years and five year AAA corporate bonds offer yields of around 10.70 % and 10.75 % respectively. The ten year Government securities offer yields of around 9.10 %. The securitized instruments offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments:

Instruments	Indicative yield range
Overnight rates	8.75 – 9.00 %
90 day Commercial Paper	10.45 – 10.55 %
91-day T-bill	8.5% – 9.00 %
1 year G-Sec.	9.25 – 9.35 %
5 year G – Sec	9.25 – 9.35 %
10 year G-Sec.	9.00 % - 9.45 %
1 year AAA Bond	10.90% – 11.10 %
5 year AAA Bond	10.65% – 10.75 %

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Securities which are not quoted in Stock exchanges carry higher risk than the ones which are listed on the Stock Exchanges. While the securities which are listed on the Stock Exchanges carry less liquidity risk the ability to liquidate them depends on the secondary debt market volumes. Similarly money market instruments which are fairly liquid are not listed in exchanges due to its short tenor which may lead to losses when sold before its maturity date. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

O. INVESTMENTS OF AMC IN THE SCHEME

This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.sbimf.com) or contact your distributor.

Any surplus in this account may be credited to the scheme, whenever felt appropriate by the AMC.

The investor is requested to check the prevailing load structure of the scheme before investing.

For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centers.

Any imposition or enhancement in the load shall be applicable on prospective investments only. However, AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of dividend for existing as well as prospective investors. - 3) The introduction of the exit load/ CDSC alongwith the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load/CDSC.
- 4) A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated.

The investor is requested to check the prevailing load structure of the Scheme before investing.
