### **III. RISK FACTORS**

#### **1. Standard Risk Factors**

- a. Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the Fund's objective will be achieved.
- b. As with any investment in securities, the NAV of the Magnums/Units issued under the scheme(s) can go up or down depending on the factors and forces affecting the capital markets.
- c. Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not indicate the future performance of the scheme(s) of the Mutual Fund.
- d. State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs towards setting up of the mutual fund.
- e. SBI CAPITAL PROTECTION ORIENTED FUND - SERIES I is only the name of the scheme and does not, in any manner, indicate either the quality of the scheme or its future prospects and returns.
- f. The NAV of the Schemes' Magnums / Units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.

#### **2. Scheme-specific Risk Factors**

- a. The scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the scheme and not from any bank guarantee, insurance cover etc.
- b. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted by changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- c. The rating provided by the CRISIL, only assesses the degree of certainty for achieving the objective of the scheme i.e. capital protection and does not denote any opinion on the stability of the NAV of the scheme. The rating would be reviewed on a quarterly basis.
- d. CRISIL reserves the right to suspend, withdraw or revise the ratings assigned to the portfolio structure of this scheme at any time, on the basis of any new information or unavailability of information or any other circumstances, which CRISIL believes may have impact on the above ratings.
- e. The Asset Management Company shall not repurchase units of SBI Capital Protection Oriented Fund - Series I ('the scheme') before end of the maturity period. However, the scheme may be listed on one or more Stock Exchange(s) in India at the discretion of the Trustees.
- f. Investors in the Scheme are not being offered any guaranteed / assured returns.
- g. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Offer Document.
- h. Redemption by the Magnum / Unit Holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- i. The tax benefits described in this Offer Document are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Magnum / Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Magnum / Unit Holder is advised to consult his/her/its own professional tax advisor.
- j. Investments under the scheme may also be subject to the following risks:
  - i. Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
  - ii. Credit risk: Credit risk is risk resulting from uncertainty in the counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
  - iii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
  - iv. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.

- v. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- vi. Derivative risks: The Derivatives will entail a counter-party risk to the extent of the amount that can become due from the party. The cost of hedge can be higher than the adverse impact of market movements. An exposure to Derivatives in excess of the hedging requirements can lead to losses. An exposure to Derivatives can also limit the profits from a genuine investment transaction. Efficiency of a Derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with the investing directly in securities and other traditional investments.
- k. The initial issue expenses incurred for the launch of the scheme would be amortized over the close ended tenor of the scheme i.e. Five years. Amortization of initial issue expenses would be over and above the annual recurring expenses and to that extent would have an impact on the NAV of the scheme over the close ended tenor of the scheme i.e. five years. The impact on the NAV has been explained in this offer document.
- l. Different types of securities in which the scheme would invest as given in the Offer Document carry different levels of risk. Accordingly the scheme's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risk than bonds, which are AA rated.
- m. The scheme shall have only growth option, and as such, there will not be any dividend declaration under the scheme through out the tenure of the scheme.
- n. Neither this Offer Document nor the Magnums / Units have been registered in any jurisdiction. The distribution of this Offer Document in certain jurisdictions may be restricted or totally prohibited by registration requirements and accordingly, persons who come into possession of this Offer Document are required to inform themselves about and to observe any such restrictions and or legal compliance requirements.
- o. No person has been authorized to issue any advertisement or to give any information or to make any representations other than that contained in this Offer Document. Circulars in connection with this offering not authorized by the Mutual Fund and any information or representations not contained herein must not be relied upon as having been authorized by the Mutual Fund.
- p. As per SEBI circular SEBI/IMD/Cir No. 10/22701/03 dated 12th December 2003, each scheme and individual plan(s) under the schemes should have a minimum of 20 investors and no single investor should account for more than 25% of the corpus of such scheme/plan(s). In case of non compliance with the above two conditions immediately after the close of the NFO itself i.e. at the time of allotment, the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 would become applicable automatically without any reference from SEBI. Accordingly, schemes /plans shall be wound up by following the guidelines laid down by SEBI.

### 3. Notification for Prevention of Money Laundering Act

The AMC shall comply with all applicable anti money laundering law and regulations in all of its operations, including without limitation, the Prevention of Money Laundering Act, 2002 and the rules under it, which have been notified in the Gazette and made effective from July 1, 2005.

It may also re-verify any of the aforesaid information provided and obtain any missing or additional information for this purpose as it deems fit.

In this behalf the AMC reserves the right to reject any application and make a mandatory redemption of units allotted at any time within a reasonable time period from the date of the application. If the payment for purchase of Magnums/Units are made by a third party (e.g. a Power of Attorney Holder, a Financing agency, a relative, etc.), the Magnum/Unit Holder may be required to give such details of such transaction so as to satisfy the AMC of the source and / or consideration underlying the transaction.

## VIII. INVESTMENT OBJECTIVE AND POLICIES

### 1. Type of Scheme

A 5 - Year Close – Ended Capital Protection Oriented Fund.

### 2. Investment Objective

The scheme endeavours to protect the capital invested through focused investments in debt and money market instruments as well as equity while at the same time also seeking to provide investors with opportunities for long-term growth in capital.

### 3. Asset Allocation Pattern

Under normal circumstances the asset allocation pattern would be as follows:

Instrument	Allocation	Risk Profile
Debt Securities & Money market instruments	73-100%	Medium to low
Securitized Debt (part of Debt securities)	0 - 20%	Medium
Equity and equity related instruments including derivatives	0 – 27%	High

There can be no assurance that the investment objective of the scheme will be realized. The scheme will also review these investments from time to time keeping in view the extant SEBI Regulations and the Fund Manager may churn the portfolio to the extent as considered beneficial to the investors.

The scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the scheme and not from any bank guarantee, insurance cover etc.

### 4. Investment Strategy:

Debt Investments will be in Government Securities and in securities having the highest investment grade rating. Investments in debt securities in the scheme will be largely limited to those having maturities not exceeding the residual maturity of the scheme. The scheme will invest in fixed debt instruments only.

Equity investments will be in stocks listed on NSE and BSE having a market capitalisation equal to or higher than the market capitalisation of the least market capitalised stock of the BSE 100 Index. The equity component will have minimum of 10 stocks.

Pursuant to rating assigned by CRISIL vide letter no. SH/SBIFMPL/2007-08/047 dated June 21, 2007; the following warranties have been furnished to CRISIL:

#### a. Initial investment

The initial investment mix between the fixed income securities and equity shall be such that the maturity value of the fixed income portfolio, at the time of scheme's redemption, net of all expenses is more than or equal to the face value of the units issued.

#### b. Expenses

The one time initial expenses and annual recurring expenses shall not exceed 6% of the funds mobilised and 2.25% of the AUM in the scheme, as agreed by the AMC. It is however likely to be around 4.50% & 2.0%.

#### c. Dividend option

If dividend is declared under the scheme, it shall be limited to the realized surplus under the equity portion of the scheme.

#### d. Investment guidelines

The fixed income component of the Scheme shall be invested only in Government of India Securities (G-Secs) and/or other fixed income instruments rated AAA/AAA(so) by CRISIL. Prior approval shall be obtained from CRISIL before investing in any non-CRISIL rated fixed income security. The AMC shall provide adequate information on such companies that are not rated by CRISIL to enable CRISIL to take an implicit rating view. If any fixed income security gets downgraded during the tenure of the scheme, the AMC will ensure that the credit quality of the fixed income portfolio should be equivalent to AAf (the rating definition of AAf is as follows – The fund's portfolio holdings provide very strong protection against losses from credit defaults). If otherwise CRISIL will analyze the protection available from the debt and equity holdings of the scheme at that time, to decide whether the rating of AAA(so) on the capital protected fund can be maintained.

The scheme shall not invest in securitized instruments, other than single loan sell downs.

## **SBI CAPITAL PROTECTION ORIENTED FUND - SERIES I**

Exposures to derivative instruments shall be such that the notional value of such exposures together with the investments in equities will not exceed the allocation of the corpus towards equity investments at any point of time.

No securities lending transactions would be engaged in.

### **e. Concentration limits**

No single investment in either debt or equity shall comprise more than 15% of the total fund size of the Scheme.

### **f. Investment horizon**

While selecting the fixed income securities for the debt component, the Scheme shall as far as possible invest in securities with maturity (or a Put Option with the investor) within 30 days prior to the date of the scheme's redemption. In no circumstances the scheme shall invest in fixed income securities with maturities beyond the scheme's redemption date. While selecting fixed income securities for the debt portfolio, as far as possible, the scheme shall invest in securities with a one time bullet payments of principal at maturity to minimize reinvestment risks. The scheme shall not invest in securities with early call options.

### **g. Passive investment strategy for fixed income securities**

The scheme shall follow a passive investment strategy for the fixed income component of the Scheme. Active trading in debt instruments can be done only if the additional yield on the new instruments, with the same tenor as the original instrument, more than compensates for the impact cost incurred on selling the original security.

### **h. Counterparties**

Exposures to counterparties will be only to CRISIL approved entities.

### **i. MIS**

The AMC shall submit to CRISIL the monthly portfolio of the Fund providing details of the securities held, money market instruments, other assets and counter party exposures including swaps, derivative contracts etc and their values and such other information as may be required by CRISIL for the purpose of its review.

This scheme has been rated AAA (so) by CRISIL. The rating only indicates highest degree of certainty regarding payment of face value of investment to the unit holders on maturity and is not an opinion on the stability of the scheme's NAV before its maturity date. Further, rating shall be reviewed on a quarterly basis, and hence, can be suspended, withdrawn or rated at a lower grade depending on any new information or unavailability of information or any other circumstances, which CRISIL believes, may have impact on the above ratings.

Investment in equities would be through primary as well as secondary market and in derivatives.

SBI Capital Protection Oriented Fund – Series I, as part of overall investment strategy, would also be investing in securitized debt/paper, if such paper is a single loan sell down. The reason for such investment is that in normal securitized bonds, banks usually bundle a number of loans and package them and sell them to investors. Cash flows in such bonds come in various time frames over the life of the bond and the investor faces the reinvestment risk, especially in a Capital Protection Oriented Fund as early cash flows may have an impact on the capital protection orientation. Therefore, in single loan sell down such PTCs, the underlying loan in the PTC would be a loan to a single party and have a bullet repayment on a maturity day which is close to the maturity date of the fund.

The proportion of investment in each type of security will vary in accordance with economic conditions, interest rates, liquidity and other relevant considerations, including the risks associated with each investment. Performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions. The Scheme may also enter into repurchase and reverse repurchase obligation in all securities held by it as per the guidelines and regulations applicable for such transactions. Further, the scheme may participate in trading in derivatives as permitted under SEBI (Mutual Funds) Regulations, 1996.

## **5. Debt Market in India**

Liquidity continued to be adequate last month despite advance tax outflows and quarter end. The overnight money traded in the range of 6.10% to 6.30% in the month of September except the last week when call rate tightened on account of quarter/half year ending.

The 10 year benchmark Government Security traded in the range of 7.80% to 7.95%. Non SLR yields were broadly range bound with a mild negative bias on liquidity concerns leading to a compression in spreads in the shorter end of the curve while there was some increase in the spreads in the longer tenure. The AAA 5-year yield was at about 9.63% levels (Vs 9.68% levels in last week of August). Maturity spread in 1-10 years was at about 49 bps (as opposed to 59 bps in last week of August). The credit spread of 5-year AAA was at 167 bps (Vs. 170 bps in last week of August ).

The GDP for the first quarter of 2007-08 noted a growth of 9.3% over previous year. Agriculture saw a growth of 3.8%, which was significantly higher than 2.8% seen same quarter previous year. Industry and Services sector noted a growth of 10.6% each. Manufacturing activity remained buoyant with a growth of 11.9% in the first quarter of 2007-08.

The inflation based on Wholesale Price Index for week ended 21 September 2007 was noted at 3.42%, lower than 3.79% seen as on week ended 24 August 2007. The decline was primarily on account of a benign base effect. RBI is of the view that inflation based on WPI has moderated but concerns over inflation remain due to rising food and commodity prices worldwide. A worrying factor is the continuing rise in Global crude oil prices which are hovering above US \$ 80 a barrel. The rupee continued to appreciate at the back of strong FII inflows and closed at 39.72 last month. The Forex reserves increased by USD 11.8 billion to USD 247.76 billion during the month.

The exports for the month of August 2007 grew by 18.90% and imports grew by 32.60% YoY. The trade Deficit increased to USD 6.9 billion from USD 5.3 billion over the last month. Though crude oil continues to be a major import, non oil imports especially capital goods imports continue to rise month on month.

The call money rates are expected to remain easy in the month of October at the back of adequate liquidity in the system. RBI has twin objectives of managing excess liquidity and controlling the price pressure. Inflation is down and expected to remain under the sub 4.5 % levels for the next few months. We should see a slight hardening of interest rates with the 10 year trading in the range of 7.90% to 8.05%. Further it is to be seen as to how the credit off take pans out in the next couple of months and steps RBI takes to sterilize the excess forex inflows.

## **6. Trading in Derivatives**

In order to achieve the investment objectives, the Fund will invest in derivatives in accordance with SEBI Regulations from time to time. The Fund may use hedging and/or rebalancing techniques as per SEBI regulations such as Arbitrage, Futures etc. The fund will use these strategies for hedging and/or rebalancing of the portfolio.

SEBI has also vide circular DNP/Cir-29/2005 dated 14<sup>th</sup> September 2005 permitted Mutual Funds to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, Mutual Funds shall be treated at par with a registered FII in respect of position limits in index futures, index options, stock options and stock futures contracts.

## SBI CAPITAL PROTECTION ORIENTED FUND - SERIES I

Or  
5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.

#### Illustrations

##### Arbitrage:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

1. Market goes up and the stock end at Rs 150.  
  
At the end of the month the future expires automatically:  
  
At the settlement date we assume that future price = closing spot price = Rs 150
  - a. Gain on stock is  $1000 \times (150 - 100) = \text{Rs } 50000$
  - b. Loss on future is  $1000 \times (101 - 150) = \text{Rs } - 49000$
  - c. Then gain realized is  $50000 - 49000 = \text{Rs } 1000$
2. Market goes down and the stock end at Rs 50.  
  
At the end of the month the future expires automatically:  
  
At the settlement date we assume that future price = closing spot price = Rs 50
  - a. Loss on stock is  $1000 \times (50 - 100) = \text{Rs } - 50000$
  - b. Gain on future is  $1000 \times (101 - 50) = \text{Rs } 51000$Then gain realized is  $51000 - 50000 = \text{Rs } 1000$

##### Unwinding an arbitrage position:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

The market goes up and at some point of time during the month the stock trades at Rs 150 and the future trades at Rs 149 then we unwind the position:

1. Buy back the future at Rs 149 : loss incurred is  $(101 - 149) \times 1000 = \text{Rs } - 48000$
2. Sell the stock at Rs 150 : gain realized :  $(150 - 100) \times 1000 = \text{Rs } 50000$
3. Net gain is  $50000 - 48000 = \text{Rs } 2000$

### Roll over the futures:

We keep the stocks position. If the stocks level is at Rs 150 close to the expiry the stock future is close to Rs 150 as well. Then if the actual stock future is below the next month stock future, we roll over the future position to the next expiry:

- Stock future next month is at Rs 151
- Stock future actual month is at Rs 150
- Then sell future next month at Rs 151 and buy back actual future at Rs 150 => gain of  $1000 \times (151 - 150) = \text{Rs } 1000$  and the arbitrage is continuing.

In case, the future price trades at discount to spot price (any time during the period till the expiry date) then the original position will be squared by buying the future and selling the spot market position.

### Multi option arbitrage

For a given Index:

- Buy 1,000 Index Futures at Rs 100
- Sell 1,000 European Call options, Strike price 100 at Rs 10
- Buy 1,000 European Put options, Strike price 100 at Rs 8

#### Market goes up and the Index ends at Rs 150.

At the end of the month, the In-The-Money Call options are exercised automatically (at the settlement date we assume that the In-The-Money Call price = closing spot price = Rs 150). Put options will not be exercised.

- Gain on index futures is  $1,000 \times (150 - 100) = \text{Rs } 50,000$
- Loss(cost of ) Put option is  $1000 \times (8) = \text{Rs } 8,000$
- Loss on Call is  $1,000 \times (50 - 10) = \text{Rs } 40,000$
- Net Gain is Rs. 2,000 ( $50,000 - 8,000 - 40,000$ )

#### Market goes down and the Index ends at Rs 50.

At the end of the month, the In-The-Money Put options are exercised automatically (at the settlement date we assume that the In-The-Money Put price = closing spot price = Rs 50). Call option will not be exercised.

- Loss on index futures is  $1,000 \times (50 - 100) = \text{Rs } -50,000$
- Gain on Call is  $1,000 \times 10 = \text{Rs } 10,000$
- Gain realized on Put is  $1000 \times (50 - 8) = \text{Rs } 42,000$

Then gain realized is Rs 2,000 ( $42,000 + 10,000 - 50,000$ )

### The risks involved in derivatives are:

- The cost of hedge can be higher than adverse impact of market movements
- The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives can also limit the profits from a genuine investment transaction.
- Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

## **SBI CAPITAL PROTECTION ORIENTED FUND - SERIES I**

### **Methods to tackle these risks:**

1. Hedging will not be done on a carpet basis but based on a view about interest rates, economy and expected adverse impact.
2. Limits of appropriate nature will be developed for counter parties
3. Such an exposure will be backed by assets in the form of cash or securities adequate to meet cost of derivative trading and loss, if any, due to unfavorable movements in the market.

### **The losses that may be suffered by the investors as a consequence of such investments:**

1. As the use of derivatives is based on the judgment of the Fund Manger, the view on market taken may prove wrong resulting in losses.
2. The upside potential of investments may be limited on account of hedging which may cause opportunity losses.

### **The use of derivatives for hedging will give benefit of:**

1. Curtailing the losses due to adverse movement in interest rates
2. Securing upside gains at cost

## **(B) VALUATION**

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations.
- ii. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations.

## **(C) REPORTING**

The AMC shall cover the following aspects in their reports to trustees periodically, as provided for in the Regulations:

- i. Transactions in derivatives, both in volume and value terms.
- ii. Market value of cash or cash equivalents / securities held to cover the exposure.
- iii. Any breach of the exposure limit laid down in the scheme offer document.
- iv. Shortfall, if any, in the assets covering investment in derivative products and the manner of bridging it.

The Trustees shall offer their comments on the above aspects in the report filed with SEBI under sub regulation (23) (a) of regulation 18 of SEBI Regulations.

## **7. Securitized Debt**

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitization involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as "Securitized Debt" to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency. On the recommendation of the credit rating agency, additional credit support is provided in order that the instrument may receive the desired level of rating. Typically the servicing of the receivables is continued by the seller. Cash flows as and when they are received are passed onto the investors. Features of securitization transactions include:

- Absolute and Legal true sale of assets to an SPV (with defined purposes and activities) in trust for the investors
- Reliance by the investors on the performance of the assets for repayment - rather than the credit of their Originator (the seller) or the Issuer (the SPV)
- Remoteness from the Originator
- Support for timely payments, inter-alia, in the form of suitable credit enhancements.
- Securitized debt paper usually achieves a high investment grade credit rating.
- There is a diversification of economic risks as credit risk is spread over a diversified group of obligors.

The different classes of underlying assets may include receivables under Auto loans, Consumer loans, Mortgage loans, Corporate Loans etc.

### Risks Factors for such asset classes

**Liquidity risk:** There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.

**Limited Recourse:** The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.

**Delinquency and Credit Risk:** Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly Investor Payouts to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle/Asset. However many factors may affect, delay or prevent the repossession of such Vehicle/Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle/Asset may be sold may be lower than the amount due from that Obligor.

**Risks due to possible prepayments:** Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.

**Bankruptcy of the Originator or Seller:** If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

### 8. Portfolio turnover

The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in stock markets, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

## **IX. ACCOUNTING POLICIES**

### **1. Accounting year end**

The accounts of the scheme shall be closed every year as on 31st March. The Trustees shall cause the accounts of the scheme to be maintained in such form and manner as may be decided by them and in accordance with the SEBI Regulations. The Trustees and the AMC shall, at the close of each half year, i.e., 30th September and 31st March, publish the financial results of the scheme, as provided in SEBI Regulations.

### **2. Other Accounting Policies and Standards**

- a. For the purposes of the financial statements, mutual fund shall mark all investments to market and carry investments in the balance sheet at market value. However, since the unrealized gain arising out of appreciation on investments cannot be distributed, provision has to be made for exclusion of this item when arriving at distributable income.
- b. [Dividend income earned by a scheme should be recognized, not on the date the dividend is declared, but on the date the share is quoted on an ex-dividend basis. For investments which are not quoted on the stock exchange, dividend income must be recognized on the date of declaration.]
- c. In respect of all interest-bearing investments, income must be accrued on a day to day basis as it is earned. Therefore when such investments are purchased, interest paid for the period from the last interest due date upto the date of purchase must not be treated as a cost of purchase but must be debited to Interest Recoverable Account. Similarly, interest received at the time of sale for the period from the last interest due date upto the date of sale must not be treated as an addition to sale value but must be credited to Interest Recoverable Account.
- d. In determining the holding cost of investments and the gains or loss on sale of investments, the "average cost" method must be followed.
- e. Transactions for purchase or sale of investments should be recognized as of the trade date and not as of the settlement date, so that the effect of all investments traded during a financial year are recorded and reflected in the financial statements for that year. Where investment transactions take place outside the stock market, for example, acquisitions through private placement or purchases or sales through private treaty, the transaction should be recorded, in the event of a purchase, as of the date on which the scheme obtains an enforceable obligation to pay the price or, in the event of a sale, when the scheme obtains an enforceable right to collect the proceeds of sale or an enforceable obligation to deliver the instruments sold.
- f. Bonus shares to which the scheme becomes entitled should be recognized only when the original shares on which the bonus entitlement accrues are traded on the stock exchange on an ex-bonus basis. Similarly, rights entitlements should be recognized only when the original shares on which the right entitlement accrues are traded on the stock exchange on an ex-rights basis.
- g. Where income receivable on investments has accrued but has not been received for the period specified in the guidelines issued by the Board, provision shall be made by debiting to the revenue account the income so accrued in the manner specified by guidelines issued by the Board.
- h. When in the case of an open-ended scheme units are sold, the difference between the sale price and the face value of the unit, if positive, should be credited to reserves and if negative is debited to reserve, the face value being credited to Capital Account. Similarly, when in respect of such a scheme, units are repurchased, the difference between the purchase price and face value of the unit, if positive should be debited to reserves and, if negative, should be credited to reserves, the face value being debited to the capital account.
- i. In the case of an open-ended scheme, when units are sold an appropriate part of the sale proceeds should be credited to an Equalization Account and when units are repurchased an appropriate amount should be debited to Equalization Account. The net balance on this account should be credited or debited to the Revenue Account. The balance on the Equalization Account debited or credited to the Revenue Account should not decrease or increase the net income of the fund but is only an adjustment to the distributable surplus. It should therefore be reflected in the Revenue Account only after the net income of the fund is determined.
- j. The cost of investments acquired or purchased should include brokerage, stamp charges and any charge customarily included in the broker's bought note. In respect of privately placed debt instruments any front-end discount offered should be reduced from the cost of the investment.
- k. Underwriting commission should be recognized as revenue only when there is no devolvement on the scheme. Where there is devolvement on the scheme, the full underwriting commission received and not merely the portion applicable to the devolvement should be reduced from the cost of the investment

## **Accounting and Valuation Policies with respect to Derivative Products:**

### **Options**

- Premium paid / received on bought / written option contracts shall be debited / credited to "equity option premium account" and recorded as an asset / liability.
- When the option contracts are squared off before expiry, the difference between the premium paid and received on the squared off transactions shall be recognised in the revenue account.
- When the option contracts are exercised on or before expiry, the difference between the option settlement price as determined by the exchange and the premium shall be recognised in the revenue account. If more than one option contracts in respect of the same stock / index with the same strike price and expiry date to which the squared off / exercised contract pertains is outstanding at the time of square off / exercise of the contract, the weighted average method shall be followed for determining the gain or loss.
- Premium asset / liability in respect of options not exercised / squared off as on expiry date shall be transferred to revenue account.
- As at the Balance Sheet date / date of determination, all open option positions shall be valued at the last quoted price at the exchange where it is traded. Non-traded equity option contracts shall be valued at fair value as per procedures determined by the AMC and approved by the Trustee. The unrealised appreciation / depreciation on all open positions shall be considered for determining net asset value.

### **Futures**

- Futures contracts are marked to market daily at the futures settlement price as determined by the exchange. The variation margin calculated as the difference between the trade price or the previous day's settlement price, as the case may be, and the current day's settlement price is recorded as a receivable or payable.
- When a contract is closed (squared off)/ settled (on expiry), the difference between the final settlement / square-off price and the contract price is recognised in the revenue account. If more than one futures contracts in respect of the same stock / index and expiry date, to which the squared off / settled contract pertains, is outstanding at the time of square off / settlement of the contract, the weighted average method is followed for determining the gain or loss.
- As at the Balance Sheet date / date of determination, all open futures positions are valued at the futures settlement price as determined by the exchange where it is traded. Non-traded futures contracts are valued at fair value as per procedures determined by the AMC and approved by the Trustee. The unrealised appreciation / depreciation on all open positions is considered for determining the net asset value.

The Mutual Fund shall comply with the accounting policies and standards spelt out in the Ninth Schedule of SEBI Regulations.

## **X. NAV AND VALUATION OF ASSETS OF THE SCHEME**

### **1. Valuation of Assets pertaining to the scheme**

Valuation of Assets, computation of NAV, Repurchase Price and their frequency of disclosure will be in accordance with the provisions of SEBI Regulations /Guidelines/Directives issued by SEBI from time to time. The assets of the Scheme will be valued based on the following valuation norms.

#### **A. Traded Securities**

- a. The securities shall be valued at the last quoted closing price on the stock exchange.
- b. When the securities are traded on more than one recognized stock exchange, the securities shall be valued at the last quoted closing price on the stock exchange where the security is principally traded. It would be left to the Asset Management Company to select the appropriate stock exchange, but the reasons for the selection should be recorded in writing. There should however be no objection for all scrips being valued at the prices quoted on the stock exchange where a majority in value of the investments is principally traded.
- c. Once a stock exchange has been selected for valuation of a particular security, reasons for change of the exchange shall be recorded in writing by the Asset Management Company.
- d. When on a particular valuation day, a security has not been traded on the selected stock exchange the value at which it is traded on another stock exchange may be used.
- e. When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used provide such date is not more than thirty days prior to the valuation date.
- f. When a debt security (other than Government Securities) is not traded on any stock exchange on any particular valuation day, the value at which it was traded on the principal stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than fifteen days prior to valuation date.
- g. When a debt security (other than Government Securities) is purchased by way of private placement, the value at which it was bought may be used for a period of fifteen days beginning from the date of purchase.

#### **B. Thinly Traded Securities**

##### **a. Thinly Traded Equity/Equity Related Securities:**

When trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is less than Rs. 5 lacs and the total volume is less than 50,000 shares, it shall be considered as a thinly traded security and valued accordingly.

In case trading in an equity security is suspended upto 30 days, then the last traded price would be considered for valuation of that security. If an equity security is suspended for more than 30 days, then the Asset Management Company/Trustees will decide the valuation norms to be followed and such norms would be documented and recorded.

Further it is clarified that in order to determine whether a security is thinly traded or not, the volumes traded in all recognised stock exchanges in India may be taken into account.

##### **b. Thinly Traded Debt Securities:**

A debt security (other than Government Securities) shall be considered as a thinly traded security if on the valuation date, there are no individual trades in that security in marketable lots (currently Rs 5 crore) on the principal stock exchange or any other stock exchange.

A thinly traded debt security as defined above would be valued as per the norms set for non-traded debt security.

#### **C. Non Traded Securities:**

When a security (other than Government Securities) is not traded on any stock exchange for a period of thirty days prior to the valuation date (instead of the existing provision of 60 days), the scrip must be treated as a 'non traded' security.

Non-traded Equity / Equity related securities are those securities when it is not traded on any stock exchange for a period of thirty days prior to the valuation date. Non-traded Equity Securities will be fair valued as per procedures determined by the AMC and approved by the Trustee in accordance with the SEBI Regulations and related circulars. When a debt security (other than Government Securities) is not traded on any stock exchange on a particular valuation day, the security is considered as 'Non Traded Security'. The value at which it was traded on the principal stock exchange or any other stock exchange, as the case may be, on the earliest previous day is used

provided such date is not more than 15 days prior to valuation date. When a debt security (other than Government Securities) is purchased by way of private placement, the value at which it was bought is used for a period of 15 days from the date of purchase.

#### **D. Valuation of Non-Traded / Thinly Traded Securities**

Non traded/ thinly traded securities shall be valued "in good faith" by the asset management company on the basis of the valuation principles laid down below:

##### **i. Non-traded / thinly traded equity securities:**

- a. Based on the latest available Balance Sheet, net worth shall be calculated as follows: Net Worth per share = [share capital + reserves (excluding revaluation reserves) - Misc. expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares.
- b. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.
- c. The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share.
- d. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- e. In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- f. In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security.

##### **ii. (a) Non Traded /Thinly Traded Debt Securities of Upto 182 Days to Maturity :**

As the money market securities are valued on the basis of amortization (cost plus accrued interest till the beginning of the day plus the difference between the redemption value and the cost spread uniformly over the remaining maturity period of the instruments) a similar process should be adopted for non-traded debt securities with residual maturity of upto 182 days, in the absence of any other standard benchmarks in the market. Debt securities purchased with residual maturity of upto 182 days are to be valued at cost (including accrued interest till the beginning of the day) plus the difference between the redemption value (inclusive of interest) and cost spread uniformly over the remaining maturity period of the instrument. In case of a debt security with maturity greater than 182 days at the time of purchase, the last valuation price plus accrued interest should be used instead of purchase cost. All other non traded Non Government debt instruments shall be valued using the method suggested in (ii)(b) hereof

##### **ii. (b) Non Traded/ Thinly Traded Debt Securities of Over 182 Days to Maturity.**

For the purpose of valuation, all Non Traded Debt Securities would be classified into "Investment grade" and "Non Investment grade" securities based on their credit ratings. The non-investment grade securities would further be classified as "Performing" and "Non Performing" assets

All Non Government investment grade debt securities, classified as not traded, shall be valued on yield to maturity basis as described below.

All Non Government non investment grade performing debt securities would be valued at a discount of 25% to the face value

All Non Government non investment grade non performing debt securities would be valued based on the provisioning norms.

The approach in valuation of non traded debt securities is based on the concept of using spreads over the benchmark rate to arrive at the yields for pricing the non traded security.

The Yields for pricing the non traded debt security would be arrived at using the process as defined below:

##### **Step A**

A Risk Free Benchmark Yield is built using the government securities (GOI Sec) as the base. GOI Secs are used as the benchmarks as they are traded regularly; free of credit risk; and traded across different maturity spectrums every week.

## **SBI CAPITAL PROTECTION ORIENTED FUND - SERIES I**

### **Step B**

A Matrix of spreads (based on the credit risk) are built for marking up the benchmark yields. The matrix is built based on traded corporate paper on the wholesale debt segment of an appropriate stock exchange and the primary market issuances. The matrix is restricted only to investment grade corporate paper.

### **Step C**

The yields as calculated above are Marked-up/Marked-down for ill-liquidity risk

### **Step D**

The Yields so arrived are used to price the portfolio

## **E. Valuation of securities with Put/Call Options**

The option embedded securities would be valued as follows:

### **Securities with call option:**

The securities with call option shall be valued at the lower of the value as obtained by valuing the security to final maturity and valuing the security to call option.

In case there are multiple call options, the lowest value obtained by valuing to the various call dates and valuing to the maturity date is to be taken as the value of the instrument.

### **Securities with Put option**

The securities with put option shall be valued at the higher of the value as obtained by valuing the security to final maturity and valuing the security to put option

In case there are multiple put options, the highest value obtained by valuing to the various put dates and valuing to the maturity date is to be taken as the value of the instruments.

### **Securities with both Put and Call option on the same day**

The securities with both Put and Call option on the same day would be deemed to mature on the Put/Call day and would be valued accordingly.

**(ii)(c)** Government securities (not traded for more than 30 days or one which would qualify as a thinly traded security) will be valued at cost plus accrual and amortizing the discount or premium over the like of the security.

## **F. Illiquid Securities:**

- a. Aggregate value of "illiquid securities" of scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value.

Provided that in case any scheme has illiquid securities in excess of 15% of total assets as on September 30, 2000 then such a scheme shall within a period of two years bring down the ratio of illiquid securities within the prescribed limit of 15% in the following time frame:

- b. All funds shall disclose as on March 31 and September 30 the scheme-wise total illiquid securities in value and percentage of the net assets while making disclosures of half yearly portfolios to the unitholders. In the list of investments, an asterisk mark shall also be given against all such investments which are recognised as illiquid securities.
  - c. Mutual Funds shall not be allowed to transfer illiquid securities among their schemes w.e.f. October 1, 2000.

- e. Where a scheme has illiquid securities as at September 30, 2001 not exceeding 15% in the case of an open-ended fund and 20% in the case of closed fund, the concessions of giving time period for reducing the illiquid security to the prescribed limits would not be applicable and at all time the excess over 15% or 20% shall be assigned nil value.

### G. Derivative Products

The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Regulations.

## 2. Determination of Net Asset Value

The value determined as above, will be adjusted for the following:

- a. All income and expenditure accrued.
- b. Major expenses like management fees and other periodic expenses to accrue on a day to day basis.
- c. The basis for calculation of NAV will be subject to regulations and guidelines of the SEBI issued from time to time.
- d. The NAV would be rounded off to four decimal places for the scheme.

Minor expenses, if any, will not be accrued on a day to day basis if they do not affect the NAV by more than 1%.

The Mutual Fund shall comply with the investment valuation norms spelt out in the Eighth Schedule of SEBI Regulations.

The Net Asset Value per Magnum / Unit shall be calculated by dividing the Net Assets of the scheme by the total number of Magnums/Units outstanding on the valuation date, as follows:

$$\text{NAV} = \frac{\text{Total unit capital} + \text{Reserves} + \text{Income (net of expenses)} + \text{Appreciation} / \text{-depreciation in investments}}{\text{Total no. of Magnums} / \text{Units outstanding}}$$

Any changes in securities and in the number of units will be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the NAV disclosure, the recording may be delayed upto a period of seven days following the date of the transaction, provided that as a result of the non-recording, the NAV calculations shall not be affected by more than 1%.

## 3. NAV Information and Acceptance of Applications

NAV will be calculated on a weekly basis and would be published in atleast two daily newspapers as prescribed by SEBI. NAV will be computed on Wednesday of every week.

The AMC shall update the NAVs on the web site of Association of Mutual Funds in India - AMFI ([www.amfiindia.com](http://www.amfiindia.com)) by 9.00 p.m. on weekly basis. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

## XI. LOADS AND EXPENSES

### 1. Magnum / Unit holder transaction expenses or Sales Load

The following table illustrates the expenses that the investors will incur on their purchases of units during the NFO and on sale of units at the time of maturity:

Nature of Load	Charges*
Entry Load that may be imposed on purchases of Magnums / Units	Nil**
Exit Load that maybe imposed on repurchases of Magnums / Units on maturity	Nil

\* The charges stated above are a percentage of the NAV.

In accordance with SEBI Regulations, the Repurchase Price will not be lower than 95% of the NAV.

\*\* Further, as per SEBI Circular No. SEBI/IMD/CIR No.1/64057/06 dated April 04, 2006, no Entry Load shall be charged to the investors at the time of purchase of units, in case of close-ended scheme.

### 2. Expenses

#### a. Present scheme

The new fund issue expenses charged to the scheme will be up to 6% of the corpus collected and the rest will be borne by the AMC, in accordance with SEBI (Mutual Funds) Regulations, 1996.

For the purpose of illustration, the new fund issue expenses that are estimated on a target amount of Rs. 25 crores and would approximately be 4.5% of the resources mobilized. The details are as follows:

Nature of expense	%
Advertising expenses	0.75
Printing	0.50
Marketing expenses	3.00
Other expenses*	0.25
<b>Total</b>	<b>4.50</b>

\* Other expenses would include Trustee Fee, Audit Fee, Banking & Handling Charges, Investor Communication Expenses and rating fee.

The new fund issue expenses will be amortized over the maturity tenure of the scheme i.e. five years

The concept of amortization is explained by means of an example below:

Assume that the new fund issue expenses incurred under the scheme are 4.50% (Rs. 112.50 lakhs) for a mobilization of Rs.25 crores. If this expense is spread over five years, the amortization expense per year works out to 0.90% (Rs. 22.50 lakhs) or Rs. 6165 per day.

The impact of this expense on the NAV calculation will be as follows:

Net Asset Value of the scheme on the first day after initial subscription: Rs. 25 crores

Number of units: 2.5 crores

Amortization expenses: Rs. 6165

NAV per unit: Rs.9.9998 (250000000 -6165)/25000000

The example does not factor any appreciation/depreciation on the investments which would be possible under normal market conditions or incremental inflows into the scheme on an ongoing basis. If the appreciation and incremental inflows are also factored in, then the impact of amortization on the overall NAV of the scheme would be lower than indicated above.

The total new fund issue expense is estimated to be around Rs. 112.50 lakhs which is 4.50% for a target corpus of 25 crores. This is an indicative figure only and the new fund issue expenses may change in proportion to the new fund issue corpus mobilized as indicated in the table below:

Target Corpus (Rs.)	Amount subscribed by the Investor (Rs.)	Amount available for investment (Rs.)	Amount available for NFO expenses (Rs.)
50 Crores	100	96.30	3.70
100 Crores	100	96.70	3.30

**b. Initial Issue Expenses of Past Schemes**

Magnum Income Fund-Floating Rate Plan	0.77% of the initial issue corpus	Rs. 36.50 lakhs or 0.083% of the initial issue corpus	Launched as an additional Plan in Magnum. Income Fund. Deviation is on account higher mobilizations during the IPO
MMIP Floater Plan	3.00% of initial issue expenses	Rs. 1.49 crores or 1.57% of the initial issue corpus	Deviation is on account higher mobilizations during NFO.

**c. Annual scheme recurring expenses**

The fees and expenses of operating the Scheme on an annual basis, expressed as a percentage of the amount of the scheme's weekly average net assets, are estimated as follows:

Nature of expense	(%)
AMC Fees	1.00
Marketing expenses	0.50
Registrar expenses	0.15
Custodial Charges	0.07
Miscellaneous expenses *	0.28
<b>Total</b>	<b>2.00</b>

\* Miscellaneous expenses include Trustee Fee, Audit Fee, banking & Handling Charges, Investor Communication expenses and rating fee.
