I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors:

1. Mutual Fund units and security investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
2. As with any investment in securities, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
3. Past performance of the Sponsors / AMC / Mutual Fund or their affiliates is not necessarily indicative of the future performance of the Scheme.
4. The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.5 lakh made by them towards setting up the Mutual Fund or such other accretions and additions to the same.
5. SBI Gold Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
6. The NAV's of the Scheme may be affected by the changes in the general market conditions, factors and forces affecting the capital markets in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures, currency exchange rates, changes in the government policies, taxation laws, any other policies, political and economic developments etc.
7. Subject to the Regulations, the Sponsor / affiliates / subsidiaries, the AMC or the Board of Trustees may invest either directly or indirectly in the Scheme. These entities may acquire a substantial portion of the Scheme's units and collectively constitute a major investor in the Scheme. Accordingly, redemption of units by these entities may have an adverse impact on the units of the Scheme because the timing of such redemption may impact the ability of other unitholders to redeem their units. The same impact would exist for any large investor, who holds a significant number of units of the Scheme.
8. In the event of receipt of an inordinately large number of redemption requests and inability of the Underlying Scheme(s) to generate enough liquidity because of market conditions, there may be delays in redemption of units.
9. The liquidity of the Scheme's investments is inherently restricted by liquidity of Underlying Scheme.
10. Unitholders of the Scheme are not being offered any guarantee / assured returns.
11. Changes in government policy in general and in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme.

2. Scheme Specific Risk Factors:

- a. SBI Gold Fund would be investing in the units of SBI GETS. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.
- b. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- c. Investments under the scheme may also be subject to the following risks:

Market Risk

The Scheme's NAV will react to the prices of gold. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in gold prices, market movements and over longer periods during market upturns.

Additionally, the prices of gold may be affected by several factors such as global gold supply and demand, investors' expectations with respect to the rate of inflation, currency exchange rates, interest rates, etc. Crises may motivate large-scale sales of gold, which could decrease the domestic price of gold.

Some of the key factors affecting gold prices are as follows:

Asset Class Risk

The domestic price of gold may vary from time to time. Further, the returns from the types of securities in which a Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.

Central banks' sale

Central banks across the world hold a part of their reserves in gold. The quantum of their sale in the market is one of the major determinants of gold prices. A higher supply than anticipated would lead to subdued gold prices and vice versa. Central banks buy gold to augment their existing reserves and to diversify from other asset classes. This acts as a support factor for gold prices.

Macro-economic factors

A weakening dollar, high inflation, the massive US trade deficits all act in favor of gold prices. The global trend of rising interest rates also had a positive impact on gold prices. Gold being regarded as a physical asset would lose its luster in a deflationary environment as gold is used effectively as an inflation hedge.

Seasonal demand

Since the demand for Gold in India is closely tied to the production of jewellery pieces tend to increase during the times of year when the demand for jewellery is the greatest, the demand for metals tends to be strong a few months ahead of these festive seasons, especially Dussera, Diwali, Akshaya Tritiya festival and summer wedding season in India. Christmas, Mothers Day, Valentine's Day, are also major festive and shopping for Gold.

Safe keeping of Gold

The gold held by the Custodian of SBI GETS may be subject to loss, damage, theft or restriction of access due to natural event or human actions. The Trustees may not have adequate sources of recovery if its gold is lost, damaged, stolen or destroyed and recovery may be limited, even in the event of fraud, to the market value of gold at the time the fraud is discovered. The custodian will maintain adequate insurance for its bullion and custody business. The liability of the Custodian is limited under the agreement between the AMC and the Custodian which establish the Mutual Fund's custody arrangements, or the custody agreements.

Time lag in procurement/redemption of physical gold

Procurement of gold bars may take up to 1 month in case of adverse shortage of gold bars. It may not be possible to sell gold bar intentionally and may delay redemption depending on the market conditions.

Gold ETF Risk

Gold Exchange Traded Funds in which scheme will be investing, invests in gold and gold bullion. NAV of the gold ETF & NAV of the scheme will change with the change in the prices of underlying assets. The prices of gold may be affected by several factors such as demand and supply of gold, change in political, economical environment and government policy, inflation trends, currency exchange rates, interest rates, etc.

Lack of Market Liquidity

Trading in SBI GETS on the Exchange may be halted because of market conditions or for reasons that in the view of the market authorities or SEBI, trading in SBI GETS is not advisable. In addition, trading in SBI GETS is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules. There can be no assurance that the requirements of the market necessary to maintain the listing of SBI GETS will continue to be met or will remain unchanged. SBI GETS may suffer liquidity risk from domestic as well as international market.

Tracking Error Risk

- a. Tracking error means the variance between daily returns of the underlying benchmark (gold in this case) and the NAV of the scheme for any given period. NAV of the Scheme is dependent on valuation of gold. Gold has to be valued as per the formula provided by SEBI in its circular no. SEBI/IMD/CIR No. 2/65348/06 dated April 21, 2006. NAV so computed may vary from the price of Gold in the domestic market.
- b. Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying assets of the scheme. The Scheme's returns may therefore deviate from those of its Underlying assets.
- c. Tracking error could be the result of a variety of factors including but not limited to:
 - i. Delay in the purchase or sale of gold due to Illiquidity of gold,

- ii. Delay in realisation of sale proceeds,
 - iii. Creating a lot size to buy the required amount of gold
 - iv. The scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
 - v. The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
 - vi. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
 - vii. Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
 - viii. Execution of large buy / sell orders
 - ix. Transaction cost (including taxes and insurance premium) and recurring expenses
 - x. Use of gold related derivative instruments, as and when allowed by regulations
 - xi. Rebalancing of the portfolio
- d. Debt & Money market securities investments under the scheme may also be subject to the following risks:
- I. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.
 - II. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
 - III. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
 - IV. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- e. **Risk associated with Stock Lending:** The Scheme shall not engage in stock lending.
- f. **Risk associated with derivatives:** The Scheme shall not engage in derivatives.
- g. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- h. Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- i. The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.

Risk Control strategies:

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For the mitigation of the above mentioned risk-factors in underlying schemes, the Fund-Manager will follow an internal selection/allocation process approved by Investment Committee and Risk Department.

The Fund-Manager will be responsible for taking investment decisions, scheme selection, portfolio construction and timing of investment decisions within the approved framework.

The process will help to ensure the monitoring of the following within underlying schemes and for Money-Market exposures:

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the FoF will be determined by the time taken by the Mutual Fund for the redemption of units in the underlying scheme which may be significant in the event of a high number of redemption requests or a restructuring of the scheme. The liquidity of the underlying scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by ensuring that investment is in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Volatility risks:

Investments in underlying scheme will have all the risks associated with the underlying schemes including performance of gold prices, interest rate risk, volatility etc. There is the risk of volatility in markets due to external factors like liquidity flows, economic policy etc. Volatility Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Credit Risks

Investments in debt & money market instruments will have credit risks resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations Credit Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Gold ETFs

The Scheme endeavors to mitigate risks associated with investing in physical gold like risk of loss, damage, theft and natural calamities/human actions by investing in approved Gold ETF/s with appropriate limits for each Gold ETF. These limits and controls are also aimed at minimizing the risks of Impact Costs, Exchange Rate and Liquidity Risks generally associated with Gold ETFs.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME – An open ended fund of fund scheme

B. INVESTMENT OBJECTIVE

The investment objective of the Scheme is to seek to provide returns that closely correspond to returns provided by SBI Gold Exchange Traded Scheme (SBI GETS).

C. SCHEME'S ASSET ALLOCATION

The funds collected under the plan shall generally be invested consistent with the objective of the plan in the following manner:

| Instruments | Indicative allocations (% of total assets) | | Risk Profile |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|---------|-----------------|
| | Maximum | Minimum | High/Medium/Low |
| Units of SBI GETS | 100% | 95% | Medium to high |
| Reverse repo and /or CBLO and/or short-term fixed deposits and/or Schemes which invest predominantly in the money market securities or Liquid Schemes* | 5% | 0% | Low to medium |

The Scheme shall not invest in securitized debt.

*The Fund Manager may invest in Liquid Schemes of SBI Mutual Fund. However, the Fund Manager may invest in any other scheme of a mutual fund registered with SEBI, which invest predominantly in the money market securities.

When the asset allocation falls outside the range, review and rebalancing will be conducted in 5 working days.

There can be no assurance that the investment objective of the scheme will be realized.

D. TYPE OF THE INSTRUMENTS IN WHICH SCHEME WILL INVEST

- Units of SBI GETS
- Reverse repo and /or CBLO and/or short-term fixed deposits
- Schemes which invest predominantly in the money market securities or Liquid Schemes

E. WHAT IS THE INVESTMENT STRATEGIES?

To achieve the investment objective, the scheme will predominantly invest in units of SBI GETS which is registered with SEBI and / or permitted by SEBI from time to time. The investments could be made either directly with the underlying fund or through the secondary market. The scheme will also invest in money market instruments. The investment strategy would largely be active in nature. The AMC shall endeavor that the returns of SBI Gold Fund will replicate the returns generated by the underlying ETF.

The AMC shall endeavor that the returns of SBI Gold Fund will replicate the returns generated by the underlying ETF and is not expected to deviate more than 2%, on an annualized basis net of recurring expenses in the Scheme. This deviation would mostly be on account of receipt of cash flows which currently takes 5 days as per current operational procedures.

The table shows below the impact that could happen on fund performance as a result of delay in receipt of money over previous six months ending on May 31, 2011.

| | 2 Day | 3 Day | 4 day | 5 day | 6 day | 7 day |
|---------|--------|--------|--------|--------|--------|--------|
| Average | 0.14% | 0.22% | 0.29% | 0.36% | 0.44% | 0.52% |
| Max | 1.96% | 2.94% | 3.41% | 3.07% | 3.62% | 3.87% |
| Min | -2.69% | -2.90% | -3.12% | -3.19% | -3.41% | -3.38% |

Above calculations are based on SBI GETS NAV. The assumption is that entire corpus is delayed by the no. of days tabulated above. But in reality, since the daily subscription may not be material to the total corpus of the fund the impact would not be material. Moreover subscriptions over periods of time would normally be expected to iron out the deviations. The fund would endeavor to maintain the indicated asset allocation as mentioned above. However there could be a variance in the asset allocation on account of receipt of cash flows, which on an average takes 5 business days to clear given the existing operational procedure.

C.) Utilization of Funds

Transactions are accepted before the cut off time as specified by SEBI from time to time. All the transactions are reported in our Registrars and Transfer Agents system by the respective branches across India and funds get deposited into the banks accounts. On the basis of clear Funds being available for deployment, cash flows are reported to the fund manager on timely basis.

The inputs regarding cash flows by various modes of acceptance will be planned on a daily basis. The subscription/redemption request will also be reported and used as a basis for investing in SBI GETS on realization of funds. This will also form the basis for subsequent deployment of funds in SBI GETS. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. Fund Manager will either execute trade the units of SBI GETS on exchange or subscribe directly to SBI GETS (direct via AMC) depending on market dynamics in the best interest if investors.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The fund will comply with all applicable exposure limits and take actions. Effective and continuous monitoring of the scheme shall be ensured and necessary actions, if any shall be taken, if required.

Risk Mitigation for Tracking Error

| Tracking error | Source of tracking error | Measures taken by SBI MF to reduce tracking error |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tracking error with "Index": It shall be calculated as the standard deviation of the difference of the scheme and benchmark Daily returns over the concerned period. | Delay in the purchase or sale due to market Illiquidity | SBI MF appoints leaders in bullion business as Authorized participants/ Market Makers to enhance liquidity on the stock exchange and reduce the impact cost and that will help SBI MF to minimize tracking error |
| | Availability of Gold bars for creation of SBI GETS | SBI MF appoints leading bullion banks to make gold bars available for creation of underlying scheme (SBI GETS) and that in turn will help minimize tracking error |
| | Delay in receipt of subscription/SIP inflows | The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by SBI MF. The subscription/redemption request will also be reported and used as a basis for planning investments in SBI GETS. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. |
| | Funds flows in Gold fund of value lesser than Creation lot size of SBI GETS | For small amounts of inflows/outflows which are less than the creation size of SBI GETS, the SBI Gold fund will buy/sell SBI GETS units directly on the stock exchange without waiting for additional subscription redemption to minimize tracking error. |
| | The trade execution prices for SBI GETS may be different from NAV of SBI GETS. | The execution price of SBI GETS will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error. |
| | The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses, funds to meet redemptions, recurring expenses etc. | SBI MF will keep offsetting the expenses/interest against the net inflows/ outflows and keep investing/redeeming the balance amount from SBI GETS to minimize the tracking error in best interest of investors. |

M. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the CBLO (collateralized lending and borrowing facility).

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and CBLO are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments:

| Instruments | Indicative yield range |
|-------------------------|------------------------|
| Overnight rates- | 7.75%-8.00% |
| 90 day Commercial Paper | 9.10%-9.25% |
| 91-day T-bill | 8.00%-8.15% |
| 1 year G-Sec. | 8.25%-8.30% |
| 5 year G – Sec | 8.30%-8.40% |
| 10 year G-Sec. | 8.30%-8.45% |
| 1 year AAA Bond | 9.50%-9.65 % |
| 5 year AAA Bond | 9.40%– 9.45% |

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.
