### Change in Asset Allocation:

The above investment pattern is indicative and may be changed by the Fund Manager for a short-term period on defensive considerations, keeping in view market conditions, market opportunities, applicable SEBI (Mutual Funds) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit Holders. # Investment Strategy

Investment in Central and/or State Government securities are considered to be free of credit risk. However, the aim of the portfolio will be to make capital gains by actively managing interest rate risk.

# **Derivatives Strategy:**

The Scheme may take exposure to derivatives for hedging and/or non-hedging purpose as permitted by regulations from time to time. Such exposure to derivative instruments will be in line with the investment objective and overall strategy of the scheme.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies".

The risks associated with the use of derivatives are different from or possibly
greater than, the risks associated with investing directly in securities and other
traditional investments.

The scheme will predominantly be actively managed to achieve its investment objective.
