### Part III- OTHER DETAILS

#### A. COMPUTATION OF NAV

The first NAV will be calculated and announced not later than 5 business days from the date of allotment in the NFO. Subsequently, the NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to 4 decimals and Units will be allotted upto three decimal places as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed in the manner as specified under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on [www.sbimf.com](http://www.sbimf.com) and [www.amfiindia.com](http://www.amfiindia.com).

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI ([www.amfiindia.com](http://www.amfiindia.com)) by 10.00 a.m. on the following business day. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next business day. Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV

**Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:**

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2024 is Rs. 10/-.

**Purchase of mutual fund units:**

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2024, when the Applicable NAV = Rs. 10/-  
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

**Redemption/Re-purchase of mutual fund units**

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

**Scenario 1: Redemption is done during applicability of exit load**

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2025; say December 1, 2024, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)  
= Rs. 12 \* (1-1%) = Rs. 11.88/-

**Scenario 2: Redemption is done when the exit load is NIL**

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)  
= Rs. 12 \* (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to SEBI paragraph 8.1.5 of the SEBI Master Circular for Mutual Funds dated June 27, 2024.

### Illustration on Computation of NAV:

If the net assets of the Scheme are Rs. 10,55,40,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:  $10,55,40,345.34 / 1,00,00,000 = \text{Rs. } 10.5540 \text{ p.u.}$  (rounded off to four decimals)

### B. NEW FUND OFFER (NFO) EXPENSES

### **I. Introduction**

#### **A. Definitions/interpretation**

Please refer the definitions/interpretation as disclosed on our website under: <https://www.sbimf.com/offer-document-sid-kim>

#### **B. Risk factors**

##### **Scheme Specific Risk Factors:**

##### **1. Investment in Underlying scheme(s) may be subject to the following risks:**

- a) The investors of Fund of Funds shall bear the recurring expenses of Fund of Funds scheme in addition to the expenses of the underlying scheme(s) (subject to regulatory limits) in which the investments are made and hence the returns of the Fund of Funds scheme may be materially impacted or may at times be lower than the returns that investors may obtain by directly investing in such schemes.
- b) As the Fund of Funds scheme may shift the allocation weightage of between underlying scheme(s), the expenses charged being dependent on the structure of the underlying scheme(s) (being different) may lead to a non- uniform charging of expenses over a period of time.
- c) The Portfolio disclosure of Fund of Funds (FOF) scheme will be limited to providing the particulars of the allocation to the Underlying scheme(s) where FOF scheme has invested and will not include the investments made by the Underlying scheme(s).
- d) The scheme specific risk factors of each of the underlying scheme(s) become applicable where a fund of funds invests in any underlying scheme(s). Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying schemes relevant to the Fund of Funds scheme that they invest in. The investors should refer to the Scheme Information Documents and the related addendums for the scheme specific risk factors of the respective Underlying Schemes.
- e) All risks associated with Underlying Schemes, including performance of their underlying stocks, derivative instruments, stock-lending, investments in foreign securities etc., will therefore be applicable in the case of FOF scheme.
- f) Movements in the Net Asset Value (NAV) of the Underlying scheme(s) may impact the performance of FOF scheme. Any change in the investment policies or fundamental attributes of the Underlying scheme(s) will affect the performance of FOF scheme.
- g) Redemption by FOF scheme from the underlying scheme(s) would be subject to applicable exit loads, which may impact performance of FOF scheme.
- h) The underlying scheme(s) in which the FOF scheme invests may not perform in line with the market and may also not achieve its investment objective. In such a situation, the performance of the FOF scheme could be affected and its ability to achieve its investment objective may be impaired.
- i) To the extent the assets of the FOF scheme are invested in the underlying overseas fund/s the performance, risk profile, and liquidity of the FOF scheme will be directly related to those of the underlying scheme(s).
- j) In the event of receipt of an inordinately large number of redemption requests and inability of the Underlying Scheme(s) to generate enough liquidity because of market conditions, there may be delays in redemption of units
- k) If the underlying scheme(s) winds up the scheme for any reason, the FOF scheme may have to find the similar alternative scheme. Until such alternative is found and investments transferred into it, the FOF scheme may not earn scheme objective related return.
- l) The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose

and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the FOF Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.

- m) The Mutual Fund is not assuring any IDCW nor is it assuring that it will make any IDCW distributions. All IDCW distributions are subject to the availability of distributable surplus and would depend on the performance of the FOF scheme.
- n) While it would be the endeavour of the Fund Manager of the Fund of Fund scheme to invest in the target schemes in a manner, which will seek to maximize returns, the performance of the underlying scheme(s) may vary which may lead to the returns of the Fund of Funds being adversely impacted.
- o) A Fund Manager managing any one of the FOF scheme may also be the Fund Manager for any underlying scheme(s).

## **2. Risks associated with investment in units of mutual fund:**

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

- **Liquidity risk** – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with paragraph 1.12 of the SEBI Master Circular for Mutual Funds dated June 27, 2024.

- **Volatility risks:** There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors within PSUs.

- **Default risk** - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

## **3. Investment in equity & equity related investments by underlying schemes may be subject to the following risks:**

- a) Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
- b) Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
- c) The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
- d) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This

may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

**4. Investment in Debt & money market securities investments under the scheme may also be subject to the following risks:**

- a) Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.
- b) Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- c) Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
- d) Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- e) The Scheme may invest in the units of liquid mutual funds. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the right to limit redemptions will be in accordance with paragraph 1.12 of the SEBI Master Circular for Mutual Funds dated June 27, 2024.

**6. Risks associated with segregated portfolio :**

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time there is recovery of money from the issuer.
2. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity, as there may not be active trading of units in the stock market. Further trading price of units on the stock market may be at a significant discount compared to the prevailing NAV.
3. Securities which are part of the segregated portfolio may or may not recover any money, either fully or partially.

**C. Risk Control strategies**

Investments in the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. The Scheme shall invest in units of actively managed Arbitrage and actively managed Debt-oriented schemes. The risk mitigation strategies applicable to underlying schemes will also be applicable to this scheme. While these measures are expected to mitigate the risks to a large extent, there can be no assurance that these risks would be completely eliminated.

**Risk control measures for investment strategy:**

The fund will comply with the prescribed SEBI limits on exposure. Risk is monitored and necessary action would be taken on the portfolio if required.

**Risk control measures for managing liquidity:**

Mutual Fund portfolios are generally well diversified and typically endeavour to provide liquidity on a T+1/T+2 basis and aim to mitigate any risks arising out of underlying investments.

**Risk Control Measure for Duration and Credit Risk:**

This scheme will not invest in underlying schemes classified in cell C III of the PRC matrix.

For risk control, the following may be noted:

**Liquidity Risks:**

Since the investments are made in Mutual Fund units, liquidity issues in the scheme are not envisaged.

**Volatility risks:**

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

**Interest Rate Risk:**

Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk.

**II. Information about the scheme:**

**A. Where will the scheme invest –**

The Scheme will invest in following:

- Units of actively managed Arbitrage Mutual Fund schemes
- Units of actively managed Debt oriented scheme(s),  
Money Market instruments includes Commercial Paper, Commercial Bills, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, Triparty Repo, Government securities having an unexpired maturity of less than 1 year, alternate to Call or notice money, Usance Bills and any other such short-term instruments as may be allowed under the Regulations prevailing from time to time and Cash and cash equivalents.

A brief narration of Money Market Instruments are as under:

1. Certificate of Deposits (CDs) is a negotiable money market instrument issued by scheduled commercial banks and select all- India Financial Institutions that have been permitted by the RBI to raise short term resources.
2. Commercial Paper (CPs) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.
3. Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-Bills are issued for maturities of 91 days, and 364 days. T-bills are issued at a discount to their face value and redeemed at par.
4. Triparty Repo.

5. Securities created and issued by the Central Governments as may be permitted by RBI, securities guaranteed by the Central Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Central Government Securities are sovereign debt obligations of the Government of India with zero-risk of default and issued on its behalf by RBI. They form part of Government's annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, Fixed Interest security with staggered maturity payment etc.
6. Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. When the seller sells the security with an agreement to repurchase it, it is Repo transaction whereas from the perspective of buyer who buys the security with an agreement to sell it at a later date, it is reverse repo transaction. The scheme can participate in Repo/Reverse Repo in G-Secs and T-Bills.

## DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) , Treasury Bills (issued by RBI) and the Triparty Repo .

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and Triparty Repo are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment ) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on April 07, 2025:

Instruments	Indicative yield range
Overnight rates	6.00-6.05
90 day Commercial Paper	6.65-6.70
91-day T-bill	6.10-6.15
1 year G-Sec	6.20-6.25

Instruments	Indicative yield range
5 year G – Sec	6.40-6.45
10 year G-Sec	6.60-6.65
1 year AAA Bond	7.05-7.10
5 year AAA Bond	7.05-7.10

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

#### **B. What are the investment restrictions?**

The investment policies of the scheme comply with the rules, regulations and guidelines laid out in the SEBI Regulations. As per the Regulations, specifically the Seventh Schedule, the following investment limitations are applicable to schemes of Mutual Funds as amended from time to time.

- a. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if, -
  - (i) such transfers are done at the prevailing market price for quoted instruments on spot basis.  
explanation - "spot basis" shall have the same meaning as specified by the stock exchange for spot transactions,
  - (ii) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
  - (iii) For meeting liquidity requirement in a scheme in case of unanticipated redemption pressure
  - (iv) For Duration/Issuer/Sector/Group rebalancing
- b. **Swing STP**

Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month,

then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

**Terms & conditions of Swing STP are as follows:**

- Source scheme: All open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.

From the second Swing STP installment onwards, the transfer amount will be derived by the following formula: <b>In case Top-up amount mentioned as absolute amount:</b> Target market value Minus Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer. Target market value = (Target market value at the time of last installment + First installment amount + (Top-up absolute amount X Number of installments excluding the current installment)).
