Investment Strategy

The Scheme will track NIFTY50 Equal Weight Index and will use a "passive" or indexing approach to endeavour to achieve scheme's investment objective. Unlike other funds, the scheme will not try to "beat" the market it track and do not seek temporary defensive positions when market decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/ underperformance vis-à-vis a benchmark.

The scheme will primarily invest in the securities constituting the underlying index. However, Due to corporate action in companies comprising of the index, the scheme may be allocated/allotted securities which are not part of the index. The scheme may hold upto 5% of their total assets in stocks not included in the corresponding Underlying Index. For example, the AMC may invest in stocks not included in the relevant underlying index in order to reflect various corporate actions (such as mergers) and other changes in the relevant Underlying Index (such as reconstitutions, additions, deletions and these holdings will be in anticipation and in the direction of impending changes in the underlying index).

These investments which fall outside the underlying index shall be rebalanced within a period of 7 calendar days

Derivative Strategies: The Scheme may take an exposure to equity derivatives of constituents of the underlying index or the index itself for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted subject to rebalancing within 7 days (or as specified by SEBI from time to time). The exposure of scheme in derivative instruments for non hedging and rebalancing purpose shall be up to 5% of the net assets of the scheme.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies".

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk Profile of the Scheme

Equity and equity related risk:

- a) Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
- b) The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the scheme portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the scheme portfolio.
- c) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

Risk associated with derivatives:

- a. The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance unit holders' interest. Investors should understand that derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include but are not limited to the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. There may be a cost attached to selling or buying futures or another derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of a liquid secondary market for a futures contract or listed option may result in inability to close futures or listed option positions prior to their maturity date.
- b. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.
- c. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- d. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
- e. An exposure to derivatives can also limit the profits from a genuine investment transaction.
- f. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
- g. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments

Market trading risk: Investments in the scheme may be subject to the following market trading risks: Absence of a prior active market, lack of market liquidity, Units of the scheme may trade at prices other than NAV, Regulatory Risk, Right to Limit Redemptions, Redemption Risk, Asset Class Risk, Units to be held only through demat accounts.

Tracking error risk: The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the respective scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. The tracking error i.e. the annualized standard deviation of the difference in

daily returns between the underlying index and the NAV of the Scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

Tracking difference risk: The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. Tracking Difference is the Difference of returns between the Scheme and the Benchmark Index annualized over 1 year, 3 Year, 5 Year,10 year and Scheme Since Inception period. It will be the endeavor of the fund manager to keep the tracking difference as low as possible. Tracking Difference shall be disclosed only if the scheme has completed 1 year period. The Tracking difference is to be disclosed on a monthly basis on www.sbimf.com and AMFI website.

Passive Investments: As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Risk pertaining to Nifty50 Equal Weight Index: Nifty50 Equal Weight Index comprises of well diversified stocks. Equities are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity instruments is due to various micro and macroeconomic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

Risks pertaining to transaction in units through stock exchange Mechanism: Lack of Market Liquidity: The Scheme may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists.

Risks associated with Securities Lending: Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

There are risks associated with Investment in Equities and equity related instruments like volatility, inability of the Scheme to make intended securities purchases and sale. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme and there are also price fluctuations risks associated with the underlying Index

Risks associated with investment in units of mutual fund: Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal

• Liquidity risk: The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees may limit

redemptions (including suspending redemptions) under certain circumstances as specified under the Scheme Information Document.

- Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.
- Default risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Risk Factor in respect of investment in TREPs

- a. Interest rate risk: This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. While the rate of interest for TREPs remains closely correlated to the repo rate, it also may vary based on inter-bank lending demand & supply. Hence, there remains a risk of rate at which TREPs will get re-invested.
- b. Settlement risk: Since the settlement for TREPs happens through CCIL, the risk of default from counterparty is limited. However, in case a clearing member fails to honour their settlement obligations, the "Default Waterfall" mechanism is used to make complete the settlement process. As per the waterfall mechanism, 1st step. the defaulter's margins and the defaulter's contribution to the default fund have been appropriated; 2nd step: CCIL's contribution is used to meet the losses; 3rd step: Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the nondefaulting members.

Hence, the scheme is subject to the risk of loss to the extent of initial margin and default fund contribution being invoked in the event of failure of any settlement obligations.

Risks associated with investing in State Development Loans (SDL)

Market Liquidity risk with fixed rate SDL, even though the SDL market is relatively liquid when compared to other corporate bond instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by state governments undergo any adverse changes. Interest Rate risk associated with SDL - while SDL generally carry relatively minimal credit risk since they are issued by the respective State Governments, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is, however, not unique to SDL, it exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

Risks associated with investing in Government of India Securities: Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their

prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates

Risk Control

The scheme aims to track the underlying index as closely as possible before expenses. The index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.

Investments in equity, government securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity Risks:

Stocks in the underlying index are selected by applying liquidity as one of the criterions and hence the portfolio of NIFTY50 Equal Weight Index is reasonably liquid. The index is rebalanced based on certain criteria after which certain illiquid stocks are replaced by more liquid stocks. The fund manager makes the changes to the portfolio accordingly. Therefore, liquidity issues in the scheme are not envisaged.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk.

The KYC requirements shall be governed by SEBI Circulars/ notifications and AMFI Guidelines which may change from time to time.

Once the investor has done KYC with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary including mutual funds. Investor should enclose the KYC acknowledgement letter with the investment application. Existing KYC compliant investors of the Mutual Fund can continue to invest as per the current practice.

Pursuant to SEBI circular no SEBI/HO/IMD/IMD- II DOF3/P/CIR/2021/604 dated July 26, 2021, to comply with the requirements of RTA inter-operable Platform for enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTA's (QRTA's), KFin Technologies Private Limited (KFintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral – A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs of investors that significantly reduces the need for submission of physical documents by enabling various digital / phygital (involving both physical and digital processing) services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the Platform. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using https://mfcentral.com/ and a Mobile App in future.

With a view to comply with all provisions of the aforesaid circular and to increase digital penetration of Mutual funds, SBI Mutual Fund designates MFCentral as its Official Point of Acceptance (DISC – Designated Investor Service Centre).

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the DISC or collection centres of KFintech or CAMS.

INSTRUCTIONS ON CONTROLLING PERSONS / ULTIMATE BENEFICIAL OWNER

As per PMLA guidelines and relevant SEBI circulars issued from time to time, non-individuals and trusts are required to provide details of controlling persons [CP] / ultimate beneficiary owner [UBO] and submit appropriate proof of identity of such CPs/ UBOs. The beneficial owner has been defined in the circular as the natural person or persons, who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted and includes a person who exercises ultimate effective control over a legal person or arrangement.

A. For Investors other than individuals or trusts:

- (i) The identity of the natural person, who, whether acting alone or together, or through one or more juridical person, exercises control through ownership or who ultimately has a controlling ownership interest. Controlling ownership interest means ownership of/entitlement to:
 - more than 10% of shares or capital or profits of the juridical person, where the juridical person is a company.
 - more than 10% of the capital or profits of the juridical person, where the juridical person is a partnership.
 - more than 15% of the property or capital or profits of the juridical person, where the juridical person is an unincorporated association or body of individuals.
- (ii) In cases where there exists doubt under clause (i) above as to whether the person with the controlling ownership interest is the beneficial owner or where no natural person exerts control through ownership interests, the identity of the natural person exercising control over the juridical person through other means like through voting rights, agreement, arrangements or in any other manner.
- (iii) Where no natural person is identified under clauses (i) or (ii) above, the identity of the relevant natural person who holds the position of senior managing official.

B. For Investors which is a trust:

The identity of the settler of the trust, the trustee, the protector, the beneficiaries with 10% or more interest in the trust and any other natural person exercising ultimate effective control over the trust through a chain of control or ownership.

C. Exemption in case of listed companies / foreign investors

The client or the owner of the controlling interest is a company listed on a stock exchange or is a majority-owned subsidiary of such a company, there is no need for identification and verification of the identity of any shareholder or beneficial owner of such companies and hence exempted from UBO declaration provided other requisite information is provided. Intermediaries dealing with foreign investors' viz., Foreign Institutional Investors, Sub Accounts and Qualified Foreign Investors, may be guided by the clarifications issued vide SEBI circular CIR/MIRSD/11/2012 dated September 5, 2012 and other circulars issued from time to time, for the purpose of identification of beneficial ownership of the client.
