However, such investments also entail additional risks. Such investment opportunities may be pursued by the Mutual Fund provided they are considered appropriate in terms of the overall investment objectives of the Scheme. The Scheme may then, if necessary, seek applicable permission from SEBI and RBI to invest abroad in accordance with the investment objectives of the Scheme and in accordance with any guidelines issued by SEBI/RBI from time to time. These investments shall be made subject to any/all approvals,

	<p>conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling, if any, on expenses prescribed by SEBI for offshore investment, and if no such ceiling is prescribed by SEBI, the expenses to the Scheme shall be limited to the level which, in the opinion of the Trustee, is reasonable and consistent with costs and expenses attendant to international investing. Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> 1. SBI Automotive Opportunities Fund will be investing in Equity and equity related instruments including derivatives, debt instruments, Government Securities and money market instruments (such as term/notice money market and reverse repos). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions (including suspending redemptions) under certain circumstances will be in accordance with Paragraph 1.12 of SEBI Master Circular. 2. Given that the Scheme seeks to invest in equity/equity related instruments of the companies engaged in automotive & allied business activities theme, the concentration is likely to be high in companies belonging to the said sectors. Further, the volatility and/or adverse performance of the said sectors and/or of the scrips belonging to these sectors would have a material adverse bearing on the performance of the Scheme given the nature of the mandate and resultant concentration. 3. Investment in Debt and money market instruments is subject to credit risk, liquidity risk, interest rate risk, reinvestment risk, risk associated with unrated debt instruments etc. 4. Investment in securitised debt is subject to liquidity risk, limited recourse risk, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc. 5. Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. 6. Risk associated with derivatives: Since investments would be made in derivatives such as options & futures, the risks associated with such derivatives would be applicable. 7. Risk associated with Securities Lending: If the Scheme undertakes Securities lending under the regulations, it may be exposed to the risks inherent to securities lending, including the risk of failure of the other party. 8. Risks associated with Investing in ADR/GDR/Foreign Securities: Investments in ADR/GDR/Foreign Securities carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances. 9. Risk factors associated with repo transactions in corporate debt securities: Corporate Bond Repo transactions are currently done on OTC basis and settled on non-guaranteed basis. Thus, the scheme is exposed to Credit risks on failure of the counter party to repurchase the security as contracted. 10. Risk associated with investment in mutual fund units & ETFs: Investment in ETFs is subject to tracking error. Factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies may affect the AMC's ability to achieve close correlation with the Underlying Index of the Scheme.

	<p>11. Risks associated with Investing in Structured Obligation (SO) & Credit Enhancement (CE) rated securities: SO rated securities are often complex structures, with a variety of credit enhancements. The credit risk of debt instruments which are CE rated derives their rating based on the combined strength of the issuer as well as the structure. The instruments might be subject to Liquidity risk, issuer level & structure related Credit risk.</p> <p>12. Risk factors associated with investments in REITs AND InvITS: Risk of lower-than-expected distributions: The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as dividends or the interest and principal payments from portfolio assets.</p> <p>13. Risk factors associated with imperfect hedge using Interest Rate Futures: The cost of hedge can be higher than adverse impact of market movements Price / change in price of a security may or may not be the same in spot/cash and futures segment of the market. This may lead to the hedging position not giving the exact desired hedge result. Derivatives will entail a counter-party risk to the extent of amount that can become due from the party.</p> <p>14. The Scheme is also subjected to risk factors such as Risks associated with writing covered call options for equity shares, segregated Portfolio, Structured Obligations such as Corporate / promoter guarantee, and risk factors associated with instruments having special features as detailed in the SID.</p>
Risk Control	<p>Investments in Equity and equity related instruments including derivatives, debt securities and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in the securities market.</p> <p>Further, the AMC has the necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks:</p> <p>The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Interest Rate Risk:</p> <p>Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.</p> <p>Volatility risks:</p> <p>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through</p>

		<p>100 is the highest. Under “E” and “S” assessment, the final score is a combination of company scores and sector scores. The company scores assess a company’s material parameters within the “E” or “S” pillars in relation to its peers within a sector, whereas the sector scores indicate how the sector fares relative to other sectors on “E” or “S” parameters. Controversial incidents invite a negative scoring or deflator on the “E”, “S” or “G” pillar scores. The methodology of the ERP is available here: https://www.sbimf.com/docs/default-source/esg-fund-documents/esg_methodology.pdf</p> <p>SBI Funds Management also has a proprietary framework which is sector agnostic in construct but provides guidelines to rate parameters based on relevance to the business. Governance is the most highly weighted pillar as SBI FM believes that well governed companies with strong leadership are able to create environmental and social positive value too. SBI FM’s ESG rating framework looks at ESG risks based on business activities and the mitigation measures taken by the company to avoid/reduce the impact. This is complemented by controversy tracking and all three components help in arriving at an ESG score. The Responsible Investment Policy explains the process in detail.</p>
