Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> 1. SBI Balanced Advantage Fund will be investing in Equity and equity related instruments including derivatives, debt instruments, Government Securities and money market instruments (such as term/notice money market and reverse repos). Trading volumes and settlement periods inherently restrict the liquidity of the scheme's investments. In the event of a restructuring of the scheme's investment portfolio, these periods may become significant. The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions (including suspending redemptions) under certain circumstances will be in accordance with paragraph 1.12 of the SEBI Master Circular for Mutual Funds dated May 19, 2023. 2. Investment in Debt and money market instruments is subject to credit risk, liquidity risk, interest rate risk, reinvestment risk, unrated debt instruments etc.

	<ol style="list-style-type: none"> 3. Investment in securitised debt is subject to liquidity risk, limited recourse risk, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc. 4. Risk associated with derivatives: Since investments would be made in derivatives such as options & futures, the risks associated with such derivatives would be applicable. 5. Risk associated with Stock Lending: If the Scheme undertakes Securities lending under the regulations, it may be exposed to the risks inherent to securities lending, including the risk of failure of the other party. 6. Risk factors associated with repo transactions in corporate debt securities: Corporate Bond Repo transactions are currently done on OTC basis and settled on non-guaranteed basis. Thus, the scheme is exposed to Credit risks on failure of the counter party to repurchase the security as contracted. 7. Risk associated with investment in ETFs: Investment in ETFs is subject to tracking error. Factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies may affect the AMC's ability to achieve close correlation with the Underlying Index of the Scheme. 8. Risk factors associated with investments in REITs AND InvITS: Risk of lower than expected distributions: The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as dividends or the interest and principal payments from portfolio assets. 9. Risk factors associated with imperfect hedge using Interest Rate Futures. The cost of hedge can be higher than adverse impact of market movements Price / change in price of a security may or may not be the same in spot/cash and futures segment of the market. This may lead to the hedging position not giving the exact desired hedge result. Derivatives will entail a counter-party risk to the extent of amount that can become due from the party. 10. The Scheme is also subjected to risk factors such as segregated Portfolio, risk associated with investing in ADR/GDR/Foreign Securities, Structured Obligations such as Corporate / promoter guarantee and risk factors associated with instruments having special features as detailed in the SID.
Risk Control	<p>Investments in Equity and equity related instruments including derivatives, debt securities and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p>

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Further, the Scheme may use Interest rate derivatives to mitigate the interest rate risks and rebalance the portfolio.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. To that extent the Volatility risk will be mitigated in the scheme.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Further, the Investment Manager endeavours to invest in REITS/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third

	<p>party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc</p>
