Part II. INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation pattern will be:

Type of Instrument	% of Corpus
Equities, Cumulative Convertible Preference Shares, and Fully Convertible Debentures (FCDs) & Bonds*	80-100
Money Market Instruments **	0-20

* Investment shall also be made in Partly Convertible Debentures (PCDs) and bonds including those issued on rights basis subject to the condition that as far as possible the non-convertible portion of the debentures so acquired or subscribed shall be divested within a period of 12 months. The balance funds shall be invested in short term money market instruments or other liquid instruments or both. The investment process as above will be completed within six months. In the interim period the funds will be invested in short term money market instruments or other liquid instruments or both. After 6 months from the closure of the scheme, the fund may invest an amount not exceeding 15% of the resources mobilised in money market and other liquid instruments could go upto 20% of the net assets of the scheme.

** Money Market Instruments will include Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, short term bank deposits, short-term Government securities (of maturities less than 1 year) and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.

The Scheme may invest in derivatives (equity as well as debt) and Securitized Debt, as and when, permitted by ELSS /SEBI Guidelines.

The investments may be made in primary as well as secondary markets. The portfolio will be sufficiently diversified so as to reduce the risk of underperformance due to unexpected security specific factors. If allowed in future, the fund may invest in foreign equities (subject to relevant RBI guidelines and subject to RBI approval).

Investment in FCDs & PCDs will be in securities rated as investment grade by a credit rating agency authorised to carry out such activity under the SEBI Act, 1992. In case a debt instrument is not rated, Mutual Funds may constitute committees who can approve such proposals for investments in unrated instruments subject to the approval of the detailed parameters for such investments by the Board of Directors of SBIFML and SBIMFTCPL. The Scheme being open-ended, some portion of the portfolio will be invested in highly liquid money market instruments or government paper so as to meet the normal repurchase requirements. The remaining investments will be made in securities which are either expected to be reasonably liquid or of varying maturities. However, the NAV of the Scheme may be impacted if the securities invested in are rendered illiquid after investment.

Portfolio rebalancing

The above investment pattern is indicative. The fund manager may change this on defensive considerations, and such changes shall be for short period. The funds raised under the scheme shall be invested only in transferable securities as per SEBI Regulations, 1996.

Pursuant to Paragraph 2.9 of Master Circular for mutual funds dated June 27, 2024 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2025/92 dated June 26, 2025 .in case the fund manager for any reason is not able to rebalance the asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMC) within 30 business days from the date of deviation , justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business

days from the date of completion of mandated rebalancing period. Further, it will follow timelines for rebalancing of portfolios of Mutual Fund Schemes, reporting & disclosure requirements in pursuant to Paragraph 2.9.4 of Master Circular for mutual funds. The funds raised under the scheme shall be invested only in transferable securities as per Regulation 44(1), Schedule 7 of the SEBI (Mutual Funds) Regulations, 1996.

B. WHERE WILL THE SCHEME INVEST?

Equities, Cumulative Convertible Preference Shares, and Fully Convertible Debentures (FCDs), Bonds, Money Market Instruments & repo in corporate debt.

C. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Strategy for SBI ELSS Tax Saver Fund - The scheme will invest in a diversified range of stocks. The fund manager would use a bottom-up analysis focused on a mix of fundamental factors as well as other parameters such as valuations, management quality etc. The stocks in the portfolio are carefully analysed to include companies with robust business models and sustainable competitive advantages compared to their competitors. The fund will be sector- and market-cap agnostic.

The scheme will predominantly be actively managed to achieve its investment objective.

For details pertaining to Risk Controls Strategies refer to Section II of the Scheme Information Document.

PORTFOLIO TURNOVER

The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, given the nature of the Scheme which follows a monthly cycle or rollover / positions the portfolio turnover is expected to be high. Further, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in equities, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The **First Tier** benchmark of the Scheme is BSE 500 TRI Index

The composition of the aforesaid **first tier** benchmark is such that it is most suited for comparing performance of the scheme. The trustee reserve the right to change the benchmark if due to a change in market conditions, a different index /indices appears to provide a more appropriate basis for comparison of fund performance.

Please refer to website <https://www.sbimf.com/offer-document-sid-kim>

In accordance with Regulation 25(16A), the asset management company shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the Board from time to time. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Offer Document (presently Scheme Information Document), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to four decimals as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 11.00 p.m. on every business day. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV.

Illustration on computation of NAV: If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows: 10,45,34,345.34 / 10,000,000 = Rs. 10.4534 p.u. (rounded off to four decimals)

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-1%) = Rs. 11.88/-

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to paragraph 8.1.5 of the SEBI Master Circular for mutual funds dated June 27, 2024.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. Details of source for meeting these expenses may be disclosed. AMC to ensure that no NFO expenses will be / were charged to the Scheme.

B. Risk factors

Scheme specific risk factors

- a) The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- b) In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions (including suspending redemptions) under certain circumstances will be in accordance with Paragraph 1.12 of SEBI Master Circular

The liquidity of the Scheme's investments is inherently restricted by trading volumes and settlement periods.

- c) Redemption by the unit holders due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- d) The tax benefits described in this Scheme Information Document are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
- e) The Scheme will be investing in equity & equity related instruments, debt instruments, and money market instruments (such as call money market, term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant.
- f) The Mutual Fund is not assuring any IDCW nor is it assuring that it will make any IDCW distributions. All IDCW distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- g) Stock Lending: Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate

rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

h) Investments under the scheme may also be subject to the following risks:

- i. Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
- ii. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
- iii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- iv. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- v. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

i) **Investment in Equity & Equity related investments may also be subject to the following risks:**

- Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
- The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
- The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

j) **Investments in Debt and money market instruments under the scheme may also be subject to the following risks:**

- Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

- Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- The Scheme may invest in the units of liquid mutual funds. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.

k) Risk factors associated with repo transactions in corporate debt securities:

Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

RISK CONTROL STRATEGIES:

Investments in Equity and equity related instruments, debt, money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

II. Information about the scheme:**A. Where will the scheme invest – Detailed description of the instruments (including overview of debt markets in India, if applicable) mentioned in Section I**

Equities, Cumulative Convertible Preference Shares, and Fully Convertible Debentures (FCDs), Bonds, Money Market Instruments & repo in corporate debt.

DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the triparty repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and triparty repo are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE

(ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on October 24, 2025:

Instruments	Indicative yield range (%)
Overnight rates	5.45-5.50
90 day Commercial Paper	6.05-6.10
91-day T-bill	5.43-5.45
1 year G-Sec	5.56-5.58
5 year G – Sec	6.12-6.17
10 year G-Sec	6.43-6.48
1 year AAA Bond	6.60-6.65
5 year AAA Bond	6.82-6.87

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

The Mutual Fund will pay/deduct taxes as per the applicable tax laws on the relevant date considering the provisions of the Income-tax Act, 1961 read with the Income-tax Rules, 1962 and any circulars or notifications or directives or instructions issued thereunder. Please note that grant of DTAA benefit, if any, is subject to fulfilment of stipulated conditions under the provisions of the Income-tax Act, 1961 and the relevant DTAA as well as interpretation of relevant Article of such DTAA.

In case of Resident Investors: TDS is applicable at the rate of 10% on income distributed in excess of Rs.10,000 by a mutual fund.

In case of Non-Resident Investors: TDS is applicable on any income in respect of units of a Mutual Fund at lower of 20% (plus applicable surcharge and cess) or rate of income-tax provided in the relevant DTAA (read with CBDT Circular no. 3/2022 dated 3rd February 2022), provided such investor furnishes valid Tax Residency Certificate (TRC) for concerned FY. Tax will be deducted on Short-term/Long-term capital gains at the tax rates (plus applicable Surcharge and Health and Education Cess) specified in the Finance Act 2025 at the time of redemption of units in case of Non-Resident investors (other than FIIs) only.

TDS at higher rates: In case PAN is not furnished or PAN is inoperative, then TDS as per Section 206AA of the Income-tax Act, 1961 would apply (higher of specified rate or rates in force or 20%), subject to Rule 37BC of the Income-tax Rules, 1962.

The above income-tax/TDS rates are in accordance with the provisions of the Income-tax Act, 1961 as amended by Finance Act 2025. The above rates are based on the assumption that the mutual fund units are held by the investors as capital assets and not as stock in trade.

Investors are requested to note that the tax position prevailing at the time of investment may change in future due to statutory amendment(s). The Mutual Fund will pay/deduct taxes as per the applicable tax laws on the relevant date considering the provisions of the Income-tax Act, 1961. Additional tax liability, if any, imposed on investors due to such changes in the tax structure, shall be borne solely by the investors and not by the AMC or Trustee.

The above information is provided for only general information purposes and does not constitute tax or legal advice. In view of the individual nature of tax benefits, each investor is advised to consult with his/ her tax consultant with respect to the specific direct tax implications arising out of their transactions.
