C. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme endeavours to provide long term capital appreciation/income from a mix of equity and debt investments. The scheme may also invest in Government securities, money market instruments, securitised debt, corporate debentures and bonds, quasi Government bonds or any other debt instruments, equity and equity related instruments etc as permitted by regulations. The scheme will predominantly be actively managed to achieve its investment objective.

Different asset classes exhibit different risk-return profile and relatively low correlation to each other as compared to investments within the same asset class. The fund manager will determine asset allocation between equity and debt depending on prevailing market and economic conditions. The debt-equity mix at any point of time will be a function of various factors such as equity valuations, interest rates, view on the asset classes and risk management etc.

Derivatives Strategy:
The Scheme may take exposure to derivatives for hedging and/or non-hedging purpose as permitted by regulations from time to time. Such exposure to derivative instruments will be in line with the investment objective and overall strategy of the scheme.
Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies".
The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

Portfolio Turnover
The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, given the nature of the Scheme which follows a monthly cycle or rollover / positions the portfolio turnover is expected to be high. Further, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in equities, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

vi. Investments of AMC in the Scheme –

Please refer to our website - https://www.sbimf.com/offer-document-sid-kim

In accordance with Regulation 25(16A), the asset management company shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the Board from time to time. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Offer Document (presently Scheme Information Document), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

Pursuant to regulation 43A of SEBI (Mutual Funds) Regulations, 1996 and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, AMC shall make a one-time contribution equivalent to 2 bps of the AUM of the specified debt oriented schemes as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days of request from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

In case of delay in contribution by the Scheme and AMC, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to four decimals as follows or such other formula as may be prescribed by SEBI from time to time:

$$NAV = \frac{\text{Market or Fair Value of Scheme's investments + Current Assets - Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed as prescribed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 11.00 p.m. on business day basis. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Whenever the Scheme also invests in foreign securities, the NAVs of Scheme shall be updated on daily basis on the website of the AMC and on the website of AMFI by 10:00 a.m. of the following business day in line with Paragraph 8.2 of Master Circular for mutual funds.

In case of non-availability of price/valuation for the underlying overseas investments before aforementioned timeline, consequent to which there would be inability in capturing same day price/valuation for such underlying investments, then NAV of the Scheme will be declared as and when the price/valuation for such underlying securities/ Funds is available.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV.

Illustration on computation of NAV: If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows: 10,45,34,345.34 / 10,000,000 = Rs. 10.4534 p.u. (rounded off to four decimals)

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-. Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units:

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

For exit on or before 12 months from the date of allotment – 1.00%
For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-1%) = Rs. 11.88/-

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to paragraph 8.1.5 of the SEBI Master Circular for mutual funds dated June 27, 2024.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. please refer to SAI.

3) It is assumed that expenses charged are evenly distributed throughout the year. Tax impact on customers has not been considered due to the individual nature of this impact.
4) Calculations are based on one day NAV and actual returns may differ from those considered above.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.sbimf.com) or may call at (toll free no. 1800 209 3333/1800 425 5425.) or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	• NIL - If units purchased or switched in from another scheme of the Fund are redeemed or switched out upto 10% of the units (the limit) purchased or switched on or before 1 year from the date of allotment. • 1% of the applicable NAV - If units purchased or switched in from another scheme of the Fund are redeemed or switched out in excess of the limit on or before 1 year from the date of allotment • NIL - If units purchased or switched in from another scheme of the Fund are redeemed or switched out after 1 year from the date of allotment

The charges stated ***above*** are a percentage of the NAV.

. Please note that no Exit Load shall be levied for switching between Plans within the said Scheme.

The AMC reserves the right to introduce a load structure, levy a different load structure or remove the load structure in the scheme at any time after giving notice to that effect to the investors through an advertisement in an English language daily that circulates all over India as well as in a newspaper published in the language of the region where the Head Office of the mutual fund is situated. Goods & Service tax on exit load shall be paid out of the exit load proceeds and exit load net of goods & service tax shall be credited to the scheme.

The upfront commission on investment, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

For any change in load structure AMC will issue an addendum and display it on the website/OPAT of SBI MF.

Any imposition or enhancement in the load shall be applicable on prospective investments only. At the time of changing the load structure, the mutual fund may consider the following measures to avoid complaints from investors about investment in the schemes without knowing the loads:

i. The AMC shall be required to issue an addendum and display the same on its website immediately.

ii. The addendum shall be circulated to all the distributors/brokers/Investor Service Centre (ISC) so that the same can be attached to all KIM and SID already in stock till it is updated.

iii. Latest applicable addendum shall be a part of KIM and SID. (E.g. in case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to all KIM and SID already in stock till it is updated).

iv. Further, the account statements shall continue to include applicable load structure.

In accordance with SEBI Regulations, the repurchase price will not be lower than 95% of the NAV

The investor is requested to check the prevailing load structure of the Scheme before investing.

Section II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed on our website under: https://www.sbimf.com/offer-document-sid-kim

B. Risk factors

- Scheme specific risk factors

a. SBI Balanced Advantage Fund will be investing in Equity and equity related instruments including derivatives, debt instruments, Government Securities and money market instruments (such as term/notice money market and reverse repos). Trading volumes and settlement periods inherently restrict the liquidity of the scheme's investments. In the event of a restructuring of the scheme's investment portfolio, these periods may become significant.

b. **Investments under the scheme may also be subject to the following risks:**

I. Investment in Equities:

a) Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

b) The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.

c) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

c. **Debt & money market securities investments under the scheme may also be subject to the following risks:**

a) Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.

b) Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.

c) Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.

d) Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

e) Risk associated with unrated debt instruments – Investments in unrated instruments are subject to the risk associated with investments in any other fixed income securities such as credit risk, interest rate risk etc. However, investments in unrated instruments are subject to greater risk of loss of principal and interest than rated instruments.

d. **Securitized debt investments under the scheme may also be subject to the following risks:**

a) Liquidity risk: There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.

b) Limited Recourse: The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.

c) Delinquency and Credit Risk: Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly investor pay-outs to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle/ Asset. However, many factors may affect, delay or prevent the repossession of such Vehicle/Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle/Asset may be sold may be lower than the amount due from that Obligor.

d) Risks due to possible prepayments: Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.

Bankruptcy of the Originator or Seller: If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

e. **Derivatives under the scheme may also be subject to the following risks:**

a) The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Investors should understand that derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include but are not limited to the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. There may be a cost attached to selling or buying futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of a liquid secondary market for a futures contract or listed option may result in inability to close futures or listed option positions prior to their maturity date.

b) Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.

c) No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

f. **Repo in corporate debt may also be subject to the following risk:**

Corporate Bond Repo transactions are currently done on OTC basis and settled on non-guaranteed basis. Credit risks could arise if the counterparty does not return the security as

contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also, operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme(s) being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme(s) may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

g. **Stock lending may be subject to the following risk:**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. If the Scheme undertakes stock lending under the regulations, it may be exposed to the risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

h. **Risks associated with Investing in ADR/GDR/Foreign Securities:**

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in Foreign Securities including foreign equities. Such investments carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- It is the AMC's belief that investment in Foreign Securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest only partially in Foreign Securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.
- Overseas investments will be made subject to any/all approvals, conditions thereof as may be stipulated under the SEBI Regulations or by RBI and provided such investments do not result in expenses to the Scheme(s) in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.
- To the extent that the assets of the Scheme will be invested in Foreign Securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

i. **Risks associated with segregated portfolio:**

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to

Segregated Portfolio:

1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time there is recovery of money from the issuer.
2. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity, as there may not be active trading of units in the stock market. Further trading price of units on the stock market may be at a significant discount compared to the prevailing NAV.
3. Securities which are part of the segregated portfolio may or may not recover any money, either fully or partially.

j. **Risk factors associated with investments in REITs AND InvITS:**

Risk of lower than expected distributions: The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, among other things:

- success and economic viability of tenants and off-takers
- economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
- debt service requirements and other liabilities of the portfolio assets
- fluctuations in the working capital needs of the portfolio assets
- ability of portfolio assets to borrow funds and access capital markets
- changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- amount and timing of capital expenditures on portfolio assets
- insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents
- taxation and other regulatory factors

Price-Risk: The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets.

Interest-Rate Risk: Generally, there would be an inverse relationship between the interest rates and the price of units. Generally, when the interest rates rise, prices of units fall and when interest rates drop, such prices increase.

Liquidity Risk: This refers to the ease with which REIT/InvIT units can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists

k. **Risk factors associated with imperfect hedge using Interest Rate Futures**

1. The cost of hedge can be higher than adverse impact of market movements.
2. Price / change in price of a security may or may not be the same in spot/cash and futures segment of the market. This may lead to the hedging position not giving the exact desired hedge result.
3. Derivatives will entail a counter-party risk to the extent of amount that can become due

from the party.

4. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities.

l. **Risks associated with investing in ETFs:**

ETFs are passively managed and may be affected by a general decline in the Indian markets relating to its Underlying Index. ETFs invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

- ETFs are listed on a stock exchange/s, however, there can be no assurance that an active secondary market will develop or be maintained.
- Investment in ETFs is subject to tracking error. Factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies may affect the AMC"s ability to achieve close correlation with the Underlying Index of the Scheme. The AMC will endeavour to constantly minimize the tracking error and track the index as closely as possible.

m. **Risks associated with Investing in Structured Obligation (SO) & Credit Enhancement (CE) rated securities**

Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer.

Liquidity Risk: SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold.

Credit Risk: The credit risk of debt instruments which are CE rated derives rating based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

n. Risk factors associated with instruments having special features

- The scheme shall invest in certain debt instruments with special features which may be subordinated to equity and thereby such instruments may absorb losses before equity capital. The instrument is also convertible to equity upon trigger of a pre-specified event for loss absorption as may be decided by the RBI.

- The debt instruments with special features are considered as Non-Convertible Debentures, may be treated as debt instruments until converted to equity.
- The instruments are subject to features that grants issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus debt instruments with special features are subject to “Coupon discretion”, “Loss Absorbency”, “Write down on Point of Non-viability trigger(PONV) event” and other events as more particularly described as per the term sheet of the underlying instruments.
- The instrument is also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security.

C. Risk mitigation strategies

Investments in Equity and equity related instruments including derivatives, debt securities and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:
Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. To that extent the Volatility risk will be mitigated in the scheme.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Further, the Investment Manager endeavours to invest in REITS/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will

focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc

DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the triparty repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the G-sec markets and the overnight repo and triparty repo are guaranteed and done by a central counterparty, the Clearing Corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on October 24, 2025:

Instruments	Indicative yield range (%)
Overnight rates	5.45 - 5.50
90 day Commercial Paper	6.05 - 6.10
91-day T-bill	5.43 - 5.45
1 year G-Sec	5.56 – 5.58
5 year G – Sec	6.12 – 6.17
10 year G-Sec	6.43 – 6.48
1 year AAA Bond	6.60 – 6.65
5 year AAA Bond	6.82 – 6.87

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally, when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and

prepayment risk which affects the yields on the instruments.

Default frequency for STP is Monthly & default date for the start of STP is 10th • ***Flex Systematic Transfer Plan in all the open-ended schemes of SBI Mutual Fund offering Systematic Transfer Plan (STP) facility:*** Flex Systematic Transfer Plan is a facility wherein an investor under a designated open-ended Scheme can opt to transfer variable amounts linked to the value of his investments on the date of transfer at pre-determined intervals from designated open-ended scheme (source scheme) to the Growth option of another open-ended scheme (target scheme). **Terms and conditions of Flex STP are as follows:** • The amount to be transferred under Flex STP from source scheme to target scheme shall be calculated using the below formula: **Flex STP amount = [(fixed amount to be transferred per installment x number of installments already executed, including the current installment) - market value of the investments through Flex STP in the Transferee Scheme on the date of transfer]** • The first Flex STP installment will be processed for the fixed installment amount specified by the investor at the time of enrolment. From the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated above. • Flex STP would be available for Weekly, Monthly and Quarterly frequencies. • Weekly Flex STP can be done on 1st / 8th / 15th / 22nd of every month. • Flex STP is available from "Daily / Weekly" IDCW plans of the source schemes. • Flex STP is available only in "Growth" option of the target scheme.

	• If there is any other financial transaction (purchase, redemption or switch) processed in the target scheme during the tenure of Flex STP, the Flex STP will be processed as normal STP for the rest of the installments for a fixed amount. • A single Flex STP Enrolment Form can be filled for transfer into one Scheme/Plan/Option only. • In case the date of transfer falls on a Non-Business Day, then the immediate following Business Day will be considered for the purpose of determining the applicability of NAV. • In case the amount (as per the formula) to be transferred is not available in the source scheme in the investor's folio, the residual amount will be transferred to the target scheme and Flex STP will be closed. • The complete application form for enrolment / termination for Flex STP should be submitted, at least 10 days prior to the desired commencement/ termination date. • All other terms & conditions of Systematic Transfer Plan are also applicable to Flex STP. **Swing STP** Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer. **Terms & conditions of Swing STP are as follows:** • Source scheme: All open ended schemes (Excluding SBIELSS Tax Saver Fund and ETF schemes) of SBI Mutual Fund. • Target scheme: Growth option in all open ended schemes (Excluding SBI ELSS Tax Saver Fund and ETF schemes) of SBI Mutual Fund. • Frequency: Weekly, Monthly and Quarterly intervals. In case the Frequency is not indicated, Monthly frequency shall be treated as the Default Frequency. • Dates: The dates of transfers/ default dates shall be as under:

Frequency	Dates of Transfers	Default Date
Weekly Interval	1st, 8th, 15th & 22nd of every month	-
Monthly Interval	1st, 5th, 10th, 15th, 20th, 25th & 30th In case of February last working day)	10th of every month
Quarterly Interval	1st, 5th, 10th, 15th, 20th, 25th & 30th (In case of February last working day) The beginning of the quarter could be any month e.g. January, May, November, etc.	10th of every quarter

In case the date of transfer falls on a non-Business Day, the immediate next Business day will be considered for the purpose of determining the applicability of NAV and processing the transaction.

- The minimum amount for the first installment shall be as follows:
  - Weekly & Monthly frequency: Rs. 1,000 and in multiples of Re. 1
  - Quarterly frequency: Rs. 3,000 and in multiples of Re. 1
- Minimum number of installments
  - Weekly & Monthly frequency: 12
  - Quarterly frequency: 4
- If there is any other financial transaction (purchase / redemption / switch / SIP / DTP etc.) processed in the target scheme/plan/option during the tenure of Swing STP, the Swing STP will be processed as normal STP for the rest of the installments for the fixed amount.
- Amount of transfer: The first Swing STP installment will be processed for the installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

(First installment amount X Number of installments including the current installment) – Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer.

In case on the STP date, the amount (as specified above) to be transferred is not available in the source scheme/plan/option in the investor's folio, the residual amount will be transferred to the target scheme/plan/option and Swing STP will be closed. Investors have an option to consider earlier investments in the target scheme for calculating Swing STP amount.

- Reverse Transfer: On the date of transfer, if the market value of the investments in the target scheme/plan/option through Swing STP is higher than the target market value (first installment amount X

	number of installments including the current installment), then a reverse transfer will be effected from the target scheme/plan/option to the source scheme/plan/option to the extent of the difference in the amount, in order to arrive at the target market value. • **Top-up option**: Investor can choose Swing STP based on fixed amount installment and additionally investor has an option to choose top-up option. Under this, investor can indicate an absolute amount or percentage (in annualized terms) by which each installment amount will be increased. Amount of transfer will be calculated by taking into consideration of the target market value (including top-up amount) and actual market value of the investments in the target scheme. o Amount of transfer: The first Swing STP installment will be processed for the first installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula: **In case Top-up amount mentioned as absolute amount:** Target market value Minus Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer. Target market value = (Target market value at the time of last installment + First installment amount + (Top-up absolute amount X Number of installments excluding the current installment)). Minimum amount for Top-up (absolute amount): • Weekly & Monthly frequency: Rs. 50 per installment and in multiples of Re. 1 • Quarterly frequency: Rs. 100 per installment and in multiples of Re. 1 **In case Top-up amount mentioned in percentage:** Target Market Value less Market Value of the investments through Swing STP in the target scheme on the date of transfer. Target Market Value = (Target market value at the time of last installment + First installment amount + (Target value at the time of last installment X Top-up percentage/ No. of periods)) No. of periods will be considered as below: o For weekly frequency – 48 o For monthly frequency – 12 o For quarterly frequency – 4 Minimum percentage for Top-up (percentage option): 12% per annum

	• A single STP enrolment Form can be submitted for transfer into one Scheme/Plan/Option only. • The redemption/switch-out of units allotted in the target scheme shall be processed on First In First Out (FIFO) basis. • The provision of 'Minimum Redemption Amount' as specified in the Scheme Information Document of the source scheme (target scheme in case of Reverse Transfer) and 'Minimum Purchase Amount' specified in the Scheme Information Document of the target scheme (source scheme in case of Reverse Transfer) will not be applicable for Swing STP. • The application for enrollment / termination for Swing STP should be submitted at least 10 days before the desired commencement / termination date. • In case the Start Date is not mentioned, the application will be registered after expiry of 10 days from submission of the application as per the default date i.e. 10th of each month / quarter (or the immediately succeeding Business Day). In case the End Date is not mentioned, the application will be registered for perpetual period. • Load structure prevalent in source & target schemes (for reverse transfer) at the time of Swing STP registration will be applicable during the tenure of the Swing STP. • Swing STP will be automatically terminated if balance is not available in the source scheme/plan/option on the date of Swing STP installment processing. • The Swing STP Facility is available only for units held in Non - demat Mode in the source and target schemes. The Trustees / AMC reserves the right to change / modify the terms and conditions of the Swing STP or withdraw the Swing STP facility at the later date. **<u>Capital Appreciation Systematic Transfer Plan (CASTP):</u>** Under this facility investors can transfer capital appreciation from their invested scheme (source scheme) to another open-ended scheme (target scheme).
