This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the Scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. Investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the SBIFMPL branches or distributors or from the website www.sbimf.com.**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

Name of the Scheme	SBI Magnum Constant Maturity Fund (earlier known as SBI Magnum Gilt Fund – Short Term Plan)			
Type of Scheme	An open-ended debt scheme investing in government securities having a constant maturity of around 10 years. However, there is no guarantee or assurance that the scheme's objective will be achieved. The scheme does not guarantee or assure any returns.			
Investment Objective	The investment objective of the scheme is to provide returns to the investors generated through investments predominantly in Government securities issued by the Central Government and/or State Government such that the Average Maturity of the portfolio is around 10 years.			
Asset Allocation Pattern	Asset Allocation			Risk Profile
	Instruments	Min	Max	
	Central Government and State Government securities, T-Bills	80%	100%	Sovereign
	TRIPARTY REPO, Repo and Cash	0%	20%	Low
	<p>The Scheme may invest in debt derivatives upto 100% of the net assets of the scheme.</p> <p>As per SEBI circular SEBI/HO/IMD/DF2/CIR/P/2017/109 dated September 27, 2017, the Scheme may indulge in 'Imperfect hedging' using IRFs upto maximum of 20% of the net assets of the scheme. While the portfolio will maintain a constant maturity of around 10 years, the Fund manager will rebalance the portfolio every 6 months to achieve the investment objective.</p> <p>For detailed asset allocation, please refer to SID</p>			
Investment Strategy	Investment in Central and/or State Government securities are considered to be free of credit risk. However, the aim of the portfolio will be to make capital gains by actively managing interest rate risk.			
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>SBI Magnum Constant Maturity Fund is prone to interest rate risks like any other debt instruments. Changes in interest rates will affect the scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.</p> <p>The Scheme is subjected to risk factors associated with investments in Central and State Government securities, T-Bills, triparty repo, Repo and Cash, debt derivatives. Besides, the scheme is also subjected to risk associated with imperfect hedge using interest rate futures, Settlement Risk & Regulatory Risk associated with securities as detailed in the SID.</p>			
Risk Control	<p>Investments in debt and debt related securities carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk</p>			

	<p>Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board Level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks: The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Interest Rate Risk: Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.</p> <p>Credit Risks Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.</p> <p>Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.</p>
Plans /Options	<p>The Scheme has two sub plans – Regular Plan and Direct plan. Both sub-plans have Growth & Dividend options. Dividend option has Reinvestment, Payout & Transfer facilities</p> <p>Direct Plan:</p> <p>Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund or through Registered Investment Advisor (RIA) and is not available for investors who route their investments through a Distributor. All the features of the Direct Plan under Scheme like the investment objective, asset allocation pattern, investment strategy, risk factors, facilities offered, load structure etc. will be the same except for a lower expense ratio as detailed in Section IV – Fees and Expenses – B. – Annual Recurring Expenses of the SID. Brokerage/Commission paid to distributors will not be paid / charged under the Direct Plan. Both the plans shall have a common portfolio.</p> <p>Eligible investors: All categories of investors as permitted under the Scheme Information Document of the Scheme are eligible to subscribe under Direct Plan.</p> <p>Modes for applying: Investments under Direct Plan can be made through various modes offered by the Mutual Fund for investing directly with the Mutual Fund</p> <p>How to apply: Investors desirous of subscribing under Direct Plan of a Scheme will have to ensure to indicate “Direct Plan” against the Scheme name in the application form. Investors should also indicate “Direct” in the ARN column of the application form.</p> <p>Regular Plan</p>

This Plan is for investors who wish to route their investment through any distributor.

The default plan in following cases will be:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct	Direct Plan
3	Not mentioned	Regular	Direct Plan
4	Mentioned	Direct	Direct Plan
5	Direct	Not Mentioned	Direct Plan
6	Direct	Regular	Direct Plan
7	Mentioned	Regular	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application.

Default Options

Both plans will have growth and dividend option. Between “Growth” or “Dividend” option, the default will be treated as “Growth”. Dividend option will have Reinvestment, Payout and Transfer facilities. Between “Reinvestment”, “Payout” or “Transfer”, the default will be treated as Reinvestment.

Investor can select only one option either pay out or reinvestment in dividend plan at a Scheme and folio level. Any subsequent request for change in Dividend option viz. Payout to Reinvestment or vice-versa would be processed at the Folio / Scheme level and not at individual transaction level. Accordingly, any change in dividend option (payout / reinvestment) will reflect for all the units held under the scheme / folio.

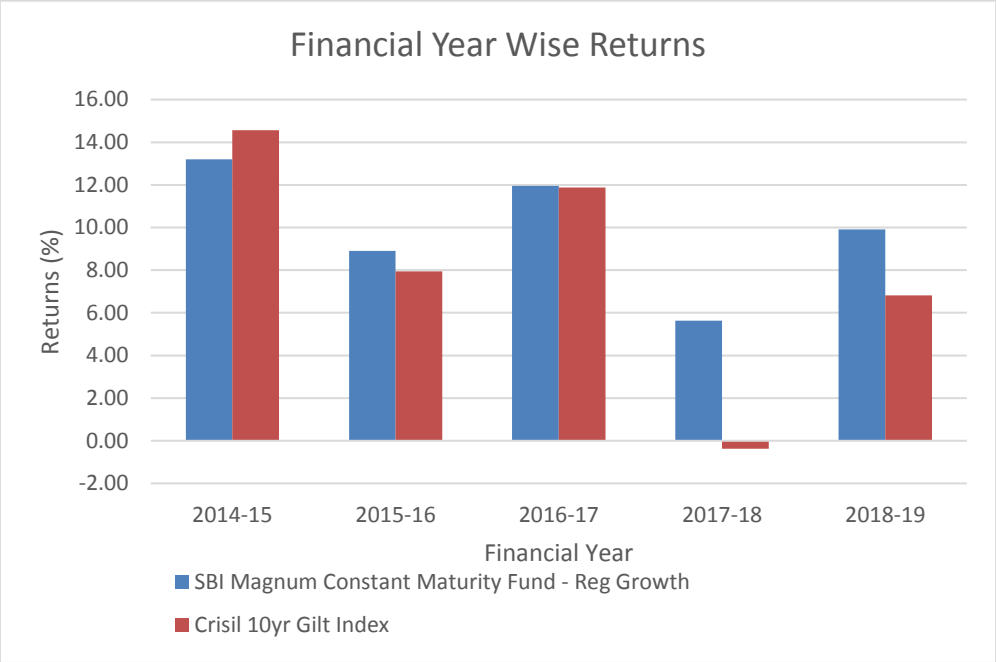

Applicable NAV

For subscription of below Rs. 2 lakhs

In respect of valid applications received upto 3 p.m. by the Mutual Fund at any of the OPAT of SBI MF along with a local cheque or a demand draft payable at par at the place where the application is received, the closing NAV of the day on which application is received shall be applicable. In respect of valid applications received after 3 p.m. by the Mutual Fund at any of the OPAT along with a local cheque or a demand draft payable at par at the place where the application is received, the closing NAV of the next business day shall be applicable.

For subscription of Rs. 2 lakhs & above: In respect of purchase of units of the scheme, the closing NAV of the day on which the funds are available for utilization shall be applicable, provided the funds are realised up to 3.00 pm on a business day, subject to the transaction being time stamped appropriately.

	<p>Note</p> <p>In case where more than one application is received for purchase/subscription/switch-in in a debt scheme (irrespective of the plan/option/sub-option) of the Fund for an aggregate investment amount equal to or more than Rs.2 lakh on any business day, then such applications shall be aggregated at Permanent Account Number (PAN) level of the first holder. Such aggregation shall be done irrespective of the number of folios under which the investor is investing and irrespective of source of funds, mode, location and time of application and payment.</p> <p>Accordingly, the applicable NAV for such investments shall be the day on which the clear funds are available for utilization before the cut off time. In case the funds are received on separate days and are available for utilization on different business days before the cut off time, the applicable NAV shall be of the Business day/s on which the cleared funds are available for utilization for the respective application amount.</p> <p>For Redemptions including Switch out: In respect of valid applications received upto 3.00 p.m. by the Mutual Fund, same days closing NAV shall be applicable. In respect of valid applications received after the cut off time by the Mutual Fund, the closing NAV of the next business day shall be applicable.</p>
Minimum Investment Amount	<p>Purchase: Rs. 5000/- and in multiples of Re. 1 thereafter</p> <p>Additional Purchase: Rs. 1000/- and in multiples of Re. 1 thereafter</p> <p>Repurchase: Rs.500/- or 1 Units or account balance whichever is lower. Please note that because of redemption, if the outstanding balance amount falls below the minimum redemption amount as per the scheme features, SBIMF reserves the right to redeem the balance units at applicable repurchase price.</p>
Despatch of Repurchase (Redemption) request	Within 10 business days of the receipt of the repurchase (redemption) request at the authorized Point of Acceptance of SBI Mutual Fund.
Benchmark Index	CRISIL 10 Year Gilt index
Dividend Policy	Dividend declaration under the dividend option of the scheme is subject to the availability of distributable surplus and recommendation of the AMC, subject to approval of the trustees and no returns are assured under the schemes.
Fund Manager	Mr. Mahak Khabia
Fund Manager - Tenure of Managing the Scheme	1 year, since May 05, 2018.

Expenses of the scheme																							
(i) Load Structure	Entry Load: Not applicable Exit Load: Nil.																						

(ii) Recurring expenses	<p>The AMC reserves the right to modify / change the load structure on a prospective basis.</p>															
	<p>The AMC has estimated that upto 2.00% (plus allowed under regulation 52(6A) of the daily net asset will be charged to the scheme as expenses. The maximum annual recurring expenses that can be charged to the Scheme, excluding issue or redemption expenses, whether initially borne by the mutual fund or by the asset management company, but including the investment management and advisory fee shall be within the limits stated in Regulations 52 read with SEBI circular no. CIR/IMD/DF/21/2012 dated September 13, 2012. The AMC may charge the investment and advisory fees within the limits of total expenses prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations.</p> <p>Pursuant to SEBI Circular No. SEBI /HO/IMD/DF2/CIR/P/2018/15 dated February 02, 2018, additional expenses under regulation 52 (6A) (c) shall not be levied if the scheme doesn't have exit load. Any other expenses which are directly attributable to the Scheme, may be charged with the approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.</p> <p>These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations. Pursuant to SEBI Notification dated December 13, 2018, the maximum total expenses of the scheme under Regulation 52(6)(c) shall be subject to following limits</p> <table border="1" data-bbox="316 981 1524 1350"> <thead> <tr> <th>Assets under management (in Rs Crores)</th> <th>Total expense ratio limits</th> </tr> </thead> <tbody> <tr> <td>On the first Rs.500 crores of the daily net assets</td> <td>2.00%</td> </tr> <tr> <td>On the next Rs.250 crores of the daily net assets</td> <td>1.75%</td> </tr> <tr> <td>On the next Rs.1,250 crores of the daily net assets</td> <td>1.50%</td> </tr> <tr> <td>On the next Rs.3,000 crores of the daily net assets</td> <td>1.35%</td> </tr> <tr> <td>On the next Rs.5,000 crores of the daily net assets</td> <td>1.25%</td> </tr> <tr> <td>On the next Rs.40,000 crores of the daily net assets</td> <td>Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.</td> </tr> <tr> <td>On balance of the assets</td> <td>0.80%</td> </tr> </tbody> </table> <p>The scheme may charge additional expenses incurred towards different heads mentioned under regulations (2) and (4), not exceeding 0.05% of the daily net assets.</p> <p>In addition to expenses as permissible under Regulation 52 (6) (c), the AMC may charge the following additional costs or expenses to the scheme:</p> <ol style="list-style-type: none"> 1. The Goods & service tax on investment management and advisory fees would be charged in addition to above limit. 2. Brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 percent for derivative transaction. Further, In terms of SEBI circular CIR/IMD/DF/24/2012 dated November 19, 2012, It is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Goods & service tax on brokerage and transaction cost paid for execution of trade, if any, shall 	Assets under management (in Rs Crores)	Total expense ratio limits	On the first Rs.500 crores of the daily net assets	2.00%	On the next Rs.250 crores of the daily net assets	1.75%	On the next Rs.1,250 crores of the daily net assets	1.50%	On the next Rs.3,000 crores of the daily net assets	1.35%	On the next Rs.5,000 crores of the daily net assets	1.25%	On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof. 		<p>rate scenario. Since the interest rates can be volatile at times, the fund will always endeavour to invest in highly liquid debt and money market instruments. The fund will follow an active duration management strategy as a result of which the portfolio turnover could be high.</p>			
SBI Dynamic Asset Allocation Fund	<p>To provide investors with an opportunity to invest in a portfolio which is a mix of equity and equity related securities and fixed income instruments. The allocation between fixed income and equity instruments will be managed dynamically so as to provide investors with long term capital appreciation</p>	<p>SBI Dynamic Asset Allocation Fund endeavours to meet the objective of this fund mainly from asset allocation between asset classes. This approach will help reduce the risk of tracking the individual asset classes. Based on historical observation, these asset classes exhibit very different risk – return profile and a low correlation to each other. Both Debt and Equity</p>	<ul style="list-style-type: none"> • Equity & Equity related instruments including foreign securities and derivatives – 0% – 100% • Debt instruments (including Central and State Government securities, debt derivatives) & Money Market Instruments (including TRIPARTY REPO, Reverse Repo and equivalent) - 0% – 100% 	649.91	20,508

		<p>tend to outperform each other on a relative risk adjusted basis under different market conditions. The fund strategy is based on the persistence of such outperformance over longer periods. The Scheme will allocate higher weight to the asset class that is relatively favourable under the prevailing market and economic conditions. The fund manager will aim for a superior risk adjusted returns over long time periods. The entire approach is rule based and involves a list of checklists and filters to generate buy and sell signals. The key feature of this approach is its design to buy into weakness and to sell into strength.</p> <p>The optimal allocation between Equity, Debt and Cash will be based</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>on three principles:</p> <ul style="list-style-type: none"> • Momentum • Rate of change in momentum • Exhaustion of momentum <p>1. Momentum: The model assesses the relative strength of momentum for each asset class by examining whether current prices are above or below historical moving average prices for short and medium-term periods. By using a combination of moving averages for different terms, we expect a higher stability and confidence in the momentum indicator. The asset class that shows a higher ratio between current price and the moving average price will get a higher weighting.</p> <p>2. Rate of change: The model uses the</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>rate of change in the momentum of the underlying assets in addition to the relative strength of the momentum to mitigate the risk of frequent changes in the signals. For an asset class to be considered strongly trending higher not only does the current price need to be above the moving averages but also the rate of change for the moving averages also need to be positive.</p> <p>3. Exhaustion of momentum: A system based on momentum indicators attempt to identify a trend that is likely to persist and remain strong for a long period. However, even with very strong well-defined trends, there is likely to be a point at which the trend gets exhausted and there will be a reversal in price. The model incorporates the</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>third and essential component of “momentum-exhaustion” which attempts to identify the price and time points at which the probability of a short-term reversal in price trend is quite high. The strategy involves tracking price behaviour and identifying price relationships that typically appear prior to and coincident with market turning points.</p> <p>This framework requires the fund manager to monitor the level, rate of change and pattern of changes in the momentum for these asset classes on a regular basis. Under normal conditions, the fund manager would take the decision to reallocate the funds based on the relative strength of momentum and its rate of change for</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>each asset class. However, given the indications of momentum exhaustion reallocation will be based on the contrary stance to the existing momentum signal. In this framework, Fund Manager will use the “momentum-exhaustion” strategy solely on the equity asset class. When either a buy or sell signal is triggered using this strategy, the weight obtained for equity using the Momentum and Rate of change framework will be over-ruled. In other words, under a “Buy” signal, the portfolio will entirely shift to the equity asset class while under the “Sell” signal, the equity weight in the portfolio will be reduced to zero. This will last as long as the buy or sell signal is active. The “momentum-exhaustion” signals</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>will eventually get deactivated either upon realizing a pre-calculated profit target or upon reaching a stop-loss level. Buy and sell signals using the “momentum-exhaustion” strategy is triggered relatively infrequently.</p> <p>The frequency of reallocation and portfolio turnover will be maintained under control by allowing small deviation from the target weights suggested by the above strategy. The asset classes will retain market adjusted weights as long as the deviation from targeted weight is below an absolute percentage threshold. The allocation strategy of SBI Dynamic Asset Allocation Fund, under certain volatile market conditions, may signal frequent rebalancing of the</p>

		<p>portfolio in a short period of time.</p> <p>The Scheme will use the derivatives for portfolio rebalancing. Use of derivatives will provide us the ability to follow these frequent signals and efficiently manage the fund. Derivatives on major equity indices are more liquid and less expensive to transact in comparison to selling or buying each individual securities in the portfolio. Derivatives will provide the ability to make larger changes in the allocation without increasing the risk of illiquidity. The exposure to derivatives will be gradually reduced as the market retains a stable trend.</p>
