Please read the full Disclaimers in relation to the NIFTY 50 Index in the Offer Document / Prospectus /Information Statement.

Type of Scheme	An open ended scheme tracking Nifty 50 Index											
Investment Objective	<p>The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as their weightage in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/loss plus dividend payments by the constituent stocks.</p> <p>However, there can be no assurance that the investment objective of the scheme will be achieved.</p>											
Asset Allocation Pattern	<p>Asset Allocation Pattern of the Scheme</p> <table border="1"> <thead> <tr> <th>Instruments</th> <th>Indicative Allocation (% of total assets)</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Stocks comprising the Nifty 50 Index</td> <td>95%-100%</td> <td>High</td> </tr> <tr> <td>Cash and Money Market Instruments</td> <td>0%-5%</td> <td>Low</td> </tr> </tbody> </table> <p>The Scheme shall make investment in derivative as permitted under the SEBI Regulations. Investment in derivatives will be upto 100% of the net assets. The cumulative gross exposure through Equity and equity related instruments including derivative position, debt, Money Market Instruments will not exceed 100% of the net assets of the scheme.</p> <p>The scheme may engage in stock lending - upto 20% of the net assets of the scheme</p> <p>The funds raised under the scheme shall be invested only in the stocks comprising the Nifty 50 Index and will be as per Regulation 44(1), Schedule 7 of the SEBI (Mutual Funds) Regulations, 1996.</p> <p>There can be no assurance that the investment objective of the scheme will be realized. The Fund Manager may churn the portfolio to the extent as considered necessary to replicate the index.</p>			Instruments	Indicative Allocation (% of total assets)	Risk Profile	Stocks comprising the Nifty 50 Index	95%-100%	High	Cash and Money Market Instruments	0%-5%	Low
Instruments	Indicative Allocation (% of total assets)	Risk Profile										
Stocks comprising the Nifty 50 Index	95%-100%	High										
Cash and Money Market Instruments	0%-5%	Low										
Investment Strategy	<p>The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks.</p> <p>The scheme will primarily invest in the securities constituting the underlying index. However, due to changes in underlying index the scheme may temporarily hold securities which are not part of the index. For example, the portfolio may hold securities not included in the respective underlying index as result of certain changes in the underlying index such as such as reconstitution, addition, deletion etc. The fund manager's endeavour would be to rebalance the portfolio in order to mirror the index; however, there may be a short period where the constituents of the portfolio may differ from that of the underlying index. These investments which fall outside the underlying index as mentioned above shall be rebalanced within a period of 30 days.</p>											
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>A. An investor in an index fund is taking a view on the movement of the stock market in general, and particularly of the stocks that constitute the index. Performance of the Nifty 50 Index will have a direct bearing on the performance of the scheme. The scheme does not seek to protect the value of investment from a fall in the Nifty 50 Index or its constituent stocks. Hence the investor is automatically assuming the risk that if the index falls; his investment is likely to depreciate to that extent. The view taken by the investors on the movements of the stock market and the Nifty is entirely their own and the AMC is not responsible for any loss arising out of the investors' decision to invest or repurchase based on their view of the market.</p> <p>B. The portfolio of the fund may underperform to the extent of the impact cost of any transaction by the fund in individual stocks. Other transaction costs and operating costs may also cause the fund to underperform.</p> <p>C. Any delay in the receipt of sale proceeds due to the settlement cycles of the stock exchanges, or delay in receipt of dividends from corporates can result in delay in reinvestment of these funds, causing some amount of underperformance. Any delay in receipt of information by the fund manager regarding the</p>											

	<p>change in the composition of the index or corporate actions (dividends, fresh issues of capital, mergers, buyback, etc) related to individual securities in the index may also result in underperformance.</p> <p>D. The performance of the scheme may also be impacted by the Tracking Error of the scheme vis-à-vis the Nifty 50 Index. The Tracking Error may arise due to the expenses that the scheme will incur on an ongoing basis, transaction costs involved in buying and selling of index shares, impact cost that may arise due to selling of stocks of the scheme at a loss to meet redemption requirements or on account of holding cash. The Tracking Error that may arise in this scheme is estimated to be in the range of 0.5% to 1.00% on an annualised basis.</p> <p>E. Risks associated with Securities Lending: Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.</p>
Risk Control	<p>The Scheme's will invest in various securities / instruments which carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks: The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Interest Rate Risk: Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.</p> <p>Credit Risks Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.</p> <p>Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification</p>

Regular plan & Direct plan.</p> <p>Direct Plan: Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund or through Registered Investment Advisor (RIA) and is not available for investors who route their</p>

How this scheme is different from the existing schemes of SBI Mutual Fund:

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs. In crores) (as on May 27, 2021)	Folio (as on May 27, 2021)
SBI Nifty Next 50 Index Fund	<p>To provide returns that closely correspond to the total returns of the securities as represented by the underlying index, subject to tracking error. However, there is no guarantee or assurance that the investment objective of the scheme will be achieved.</p>	<p>The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty Next 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty Next 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks. The scheme will primarily invest in the securities constituting the underlying index. However, due to changes in underlying index the scheme may temporarily hold securities which are not part of the index. For example, the portfolio may hold securities not included in the respective underlying index as result of certain changes in the underlying index such as reconstitution, addition, deletion etc. The fund manager's endeavour would be to rebalance the portfolio in order to mirror the index; however, there may be a short period where the constituents of the portfolio may differ from that of the underlying index. These investments which fall outside the underlying index as mentioned above shall be rebalanced within a period of 7 days.</p>	<p>Securities covered by Nifty Next 50 Index: 95% – 100% Money Market instruments* including triparty repo and units of liquid mutual fund: 0% - 5% *money market instruments include commercial papers, commercial bills, treasury bills, triparty repo, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. Other than for above purposes, the Scheme will not invest in Equity Derivatives. These investments would be for a short period of time. Exposure towards Equity Derivatives instruments shall not exceed 5% of the net assets of the Scheme. The cumulative gross exposure of equity shares, money market instruments and gross notional exposure of equity derivatives instruments shall not exceed 100%</p>	231.01	20,555
