Investment Strategy	<p>The primary strategy of the scheme would be to invest in the stocks of the PSU companies and their subsidiaries. The scheme may invest in quasi PSUs /subsidiaries of PSUs: 1. which could be part of PSU index 2. defined by management control or ability to appoint key managerial personnel and not necessarily by equity stake of 51% (but minimum PSU/ Central govt / state govt stake of 35% and highest among others is required).The scheme would endeavor to identify market opportunities and at the same time would sufficiently diversify its equity portfolio and control liquidity risks and non-systematic risks by selecting well researched stocks which have growth prospects on a long and mid-term basis in order to</p>																				

	<p>provide stability and possibility of returns in the scheme Investment in equities would be done through primary as well as secondary market, private placement / QIP, preferential/firm allotments or any other mode as may be prescribed/ available from time to time.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>SBI PSU Fund would be investing in Equities of PSU companies and their subsidiaries (including derivatives), other equity & equity related instruments, Units issued by REIT/InVIT, debt instruments (including securitized debt) and money market instruments. The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees may limit redemptions (including suspending redemptions) under certain circumstances as specified in the SID.</p> <p>As the scheme would be primarily investing in the stock of PSU companies, so any government policy which will have an impact on the Public Sector Undertakings, will impact the performance of the fund also. The scheme shall be subject to risk associated with equity and equity related instruments, REITs/InVIT, debt and money market instruments, securitized debt, derivatives and repo transactions in corporate debt securities. Besides, the scheme is also subjected to risk associated with Liquidity Risk, Settlement Risk, Stock lending risk & Regulatory Risk associated with securities as detailed in the SID.</p>
Risk Control	<p>Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks: The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Concentration Risk The scheme would be investing across PSUs and would endeavour to have an optimum degree of diversification across sectors and market capitalization ranges in order to mitigate Concentration Risk.</p> <p>Interest Rate Risk: Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.</p> <p>Political/Government Policy Risk: Changes in government policy and political decision can change the investment environment. They can create a favorable environment for investment or vice versa.</p> <p>Volatility risks:</p>

	<p>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors within PSUs. The scheme may also use derivatives for the purpose of hedging in volatile markets.</p> <p>Further, the Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.</p>																																				
Plans /Options	<p>The scheme would have two plans viz Direct Plan & Regular Plan.</p> <p>Direct Plan: Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund or through Registered Investment Advisor (RIA) and is not available for investors who route their investments through a Distributor. All the features of the Direct Plan under Scheme like the investment objective, asset allocation pattern, investment strategy, risk factors, facilities offered, load structure etc. will be the same except for a lower expense ratio as detailed in Section IV – Fees and Expenses – B. – Annual Recurring Expenses of the SID.
