## I. INTRODUCTION

### A. RISK FACTORS

#### 1. Standard Risk Factors

- a. Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the Fund's objective will be achieved.
- b. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
- c. Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not guarantee the future performance of the scheme(s) of the Mutual Fund.
- d. State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs towards setting up of the mutual fund.
- e. SBI Magnum Constant Maturity Fund is only the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- f. The NAV of the Schemes' Units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.
- g. The present scheme is not a guaranteed or assured return scheme.
- h. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

#### 2. Scheme-specific Risk Factors

- a. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document.
- b. Redemption by the Magnum / Unit Holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- c. The tax benefits described in this Scheme Information Document are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Magnum / Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Magnum / Unit Holder is advised to consult his/her/its own professional tax advisor.
- d. SBI Magnum Constant Maturity Fund is prone to interest rate risks like any other debt instruments. Changes in interest rates will affect the scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.
- e. The Mutual Fund is not assuring that it will make dividend distributions on a periodic basis. All dividend distributions are subject to the availability of distributable surplus.
- f. Subject to necessary approvals, the Scheme may invest in securities in overseas markets, which could be exposed to currency risk, sovereign risk, economic and political risks. Prices of ADR/GDR may not move in consonance with the domestic underlying stock due to currency movements and the prices could also be trading at a discount/premium to the underlying stocks
- g. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels of risk. Accordingly, the scheme's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, AAA rated bonds, are comparatively less riskier than AA rated bonds.

- h. Subject to necessary approvals, the Scheme may invest in securities in overseas markets, which could be exposed to currency risk, sovereign risk, economic and political risks. Prices of ADR/GDR may not move in consonance with the domestic underlying stock due to currency movements and the prices could also be trading at a discount/premium to the underlying stocks
- i. Stock Lending: There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement. Such failure can result in the possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.
- j. There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement. Such failure can result in the possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.
- k. Investments under the scheme may also be subject to the following risks:
- i. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
  - ii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
  - iii. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
  - iv. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- l. Risks associated with investing in Government Securities**
- Market Liquidity risk with fixed rate Government Securities - even though the Government Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.
  - Interest Rate risk associated with Government Securities - while Government Securities generally carry relatively minimal credit risk since they are issued by the Government, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.
- m. The risks involved in derivatives are:**
1. The cost of hedge can be higher than adverse impact of market movements
  2. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
  3. An exposure to derivatives in excess of the hedging requirements can lead to losses.
  4. An exposure to derivatives can also limit the profits from a genuine investment transaction.
  5. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
  6. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

## **N RISK FACTORS ASSOCIATED WITH IMPERFECT HEDGE USING INTEREST RATE FUTURES**

1. The cost of hedge can be higher than adverse impact of market movements
2. Price / change in price of a security may or may not be the same in spot/cash and futures segment of the market. This may lead to the hedging position not giving the exact desired hedge result.
3. Derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
4. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities

### **3. RISK CONTROL STRATEGIES:**

The Scheme's will invest in various securities / instruments which carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

#### **Liquidity risks:**

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

#### **Interest Rate Risk:**

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

#### **Credit Risks**

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

#### **Volatility risks:**

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

## **B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

## **C. SPECIAL CONSIDERATIONS, IF ANY**

While the portfolio will maintain a constant maturity of around 10 years, the Fund manager will rebalance the portfolio every 6 months to achieve the investment objective.

The above investment pattern is indicative and may be changed by the Fund Manager for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable SEBI (Mutual Funds) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit Holders. If the exposure falls outside the above mentioned asset allocation pattern, the portfolio to be rebalanced by AMC within the stipulated time as mentioned above from the date of said deviation.

Above rebalancing will be subject to market conditions and in the interest of the investors. If the fund manager for any reason is not able to rebalance the asset allocation within above mentioned period, the matter would be escalated to Investment Committee for further direction. The Investment Committee shall record the reason in writing leading the reason for falling the exposure outside the asset allocation and the Committee shall review and as consider necessary may further direct the manner for rebalancing the same within the range of the asset allocation as mentioned above. ## **G. GILT MARKETS IN INDIA**

The Government securities market constitutes the principal segment of debt market. It not only provides resources to the Government for meeting its short term and long term needs but also acts as the benchmark for pricing corporate papers of varying maturities. The Government Securities market includes the dated securities issued by the government, both central and state and T-bills of all maturities.

Government securities markets offer a highly liquid and zero credit risk investment avenue. This includes both the market for government and state- government securities which are issued by the central government and state governments respectively through the Reserve Bank of India (RBI). RBI is Issue Manager and the Registrar to the issue. Government securities are sold on auction basis in the primary market. The main bidders in the primary market are Primary Dealers (DFHI, STCI, SBI Gilts Ltd.), Insurance Companies, Banks, MF's and Fls. The secondary market transactions happen both on the OTC market and screen based Negotiated Order Matching System. The securities are registered in the name of holder at Public Debt Office (PDO) of the RBI. The RBI acts as a depository and maintains Subsidiary General Ledger (SGL) accounts.

The G-Sec Market is settled on-line through Negotiated Dealing System of Clearing Corporation of India Ltd. These securities are coupon bearing instruments traded at a discount/premium to the face value.

## **H. TRADING IN DERIVATIVES**

The Fund's trading in derivatives would be in line that is permitted by SEBI Regulations from time to time. The Fund may use any hedging techniques that are permissible now or in future, under SEBI regulations, in consonance with the scheme's investment objective, including investment in derivatives such as interest rate swaps. The Fund shall fully cover its position in the derivatives market by holding underlying securities / cash or cash equivalents / option and / or obligation for acquiring underlying assets to honour the obligations contracted in the derivatives market. The Fund shall maintain separate records for holding the cash and cash equivalents / securities for this purpose. The securities held shall be marked to market by the AMC to ensure full coverage of investments made in derivative products at all times.

SEBI has also vide circular DNP/DFI/Cir-29/2005 dated 14<sup>th</sup> September 2005 permitted Mutual Funds to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, Mutual Funds shall be treated at par with a registered FII in respect of position limits in index futures, index options, stock options and stock futures contracts.

### **Debt Derivatives**

The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose of hedging and portfolio balancing and as may be permitted under the Regulations and guidelines.

### **Interest Rate Swaps**

Interest rate swap is a strategy in which one party exchanges a stream of interest for another party's stream. Interest rate swaps are normally 'fixed against floating' but can also be 'fixed against fixed' or 'floating against floating' rate swaps. Interest rate swaps will be used to take advantage of interest-rate fluctuations, by swapping fixed-rate obligations for floating rate obligations or swapping floating rate obligations to fixed-rate obligations. A floating-to-fixed swap increases the certainty of an issuer's future obligations. Swapping from fixed-to-floating rate may save the issuer money if interest rates decline. Swapping allows issuers to revise their debt profile to take advantage of current or expected future market conditions.

### **Forward Rate Agreement (FRA)**

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for

the liquidity and at the same time take advantage of fixed rates by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

#### A. Illustration: Interest Rate Swap (IRS)

Assume that a Mutual Fund has INR 10 crore, which is to be deployed in overnight products for 7 days. This money will be exposed to interest rate risk on daily basis. The fund can buy an Interest Rate Swap receiving fixed interest rate and paying NSE MIBOR.

The deal will be as under:

The cash flows on a notional principal amount of Rs. 10 crores would be-

					(Rs. in Crore)
	Principal	NSE MIBOR	Interest	Amount	
Day 1		10.0000	8.10%	.0022192	10.00221918
Day 2		10.00222	8.20%	.0022466	10.00446575
Day 3		10.00447	8.30%	.002274	10.00673973
Day 4 (for 2 days)	Saturday	10.00674	8.15%	.0044658	10.01120548
Day 5	Sunday		Holiday		
Day 6		10.01121	8.40%	.0023014	10.01350685
Day 7		10.01351	8.50%	.0023288	10.01583562
Floating Interest Payable					.0158356164
Fixed Interest Receivable					.0167808219
Net Receivable for Mutual Fund receiving fixed					.0009452055

In this example Mutual Fund stands to gain by receiving fixed rates. As the NSE MIBOR floating rate is decided daily, in adverse scenario, the Mutual Fund may have to pay the difference.

The counter-party providing Swap, Options, Forward Rate Agreements (FRAs) will do the same at a cost.

Risk factors Interest rate swaps strategy:

Risk Factor: The risk arising out of uses of the above derivative strategy as under:

- Lack of opportunities available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Interest rate swaps require the maintenance of adequate controls to monitor the transactions entered into, the ability to forecast failure of another party (usually referred to as the 'counter party') to comply with the terms of the derivatives contract.

**Further the exposure limits for trading in derivatives by Mutual Funds specified by SEBI vide its Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010 are as follows:**

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
  - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
  - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 3.

- c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
  - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
  7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 3.
  8. Definition of Exposure in case of Derivative Positions.
  9. Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

**II. The risks involved in derivatives are:**

1. The cost of hedge can be higher than adverse impact of market movements
2. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
3. An exposure to derivatives in excess of the hedging requirements can lead to losses.
4. An exposure to derivatives can also limit the profits from a genuine investment transaction.
5. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
6. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

**III. Methods to tackle these risks:**

1. Hedging will not be done on a carpet basis but based on a view about interest rates, economy and expected adverse impact.
2. Limits of appropriate nature will be developed for counter parties
3. Such an exposure will be backed by assets in the form of cash or securities adequate to meet cost of derivative trading and loss, if any, due to unfavorable movements in the market.

**IV. The losses that may be suffered by the investors as a consequence of such investments:**

1. As the use of derivatives is based on the judgment of the Fund Manger, the view on market taken may prove wrong resulting in losses.
2. The upside potential of investments may be limited on account of hedging which may cause opportunity losses.

**V. The use of derivatives for hedging will give benefit of:**

1. Curtailing the losses due to adverse movement in interest rates
2. Securing upside gains at cost

**VI. VALUATION OF DERIVATIVES**

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations.
- ii. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations.

**B. ILLUSTRATION FOR IMPERFECT HEDGE ON INTEREST RATE FUTURES**

Security	Market Value (in Cr.)	Weight in the Portfolio	Yield (%)	Modified Duration	Weighted Modified Duration
GOI 7.35% 22.06.2024	50.00	10.64%	7.05	5.00	0.53
GOI 6.79% 15.05.2027	400.00	85.11%	7.03	6.85	5.83
GOI 6.68% 17/09/2031	20.00	4.26%	7.08	8.71	0.37
	470				
679GS2027 IRF	100.99				

Consider a hypothetical portfolio or a part of a larger portfolio composed of 3 different securities with a Portfolio Average Modified Duration of 6.74. On account of change in economic factors, it is expected that the interest rates could go up by 1% over the coming days. The portfolio would look to hedge the impact on this portfolio through selling IRF, of which the underlying security is different as given. This would be an example of imperfect hedge where the portfolio that is hedged and the instrument underlying the futures contract are different.

The maximum number of contracts in IRF to sold is given by the following formula = (Market Value portfolio \* Modified Duration of portfolio) / (Market Value of 1 Futures contract\* Modified Duration of futures)

Market Value Portfolio * Modified Duration Portfolio	31,654,557,509.18
Market Value of 1 Futures Contract	201,985.00
No of contracts to be sold	23,183.04
Market Value of Futures (in Cr.)	468.26
Negative Impact on Portfolio (in Cr.)	-31.65
Positive Gain on Futures (in Cr.)	31.65

The impact on portfolio due to a 1% rise in yields is approx Rs. 31.65 crs. Since the portfolio has sold IRF contracts, the gain on account of the same is around Rs. 31.65 crs. Accordingly, the loss on the underlying portfolio is hedged through IRF even as the underlying securities are different. The scheme would pursue imperfect hedging to the extent permitted by extant SEBI guidelines

Such investment limit may be extended to 25% of the net assets of the Scheme with the prior approval of the Board of Trustees.

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

n. The scheme shall not advance any loan for any purpose.

Apart from the investment restrictions prescribed under SEBI (MF) Regulations, the fund follows internal norms vis-à-vis exposure to a particular scrip or sector. These norms are reviewed on a periodic basis and monitored regularly.

These exposure limits are being followed with the objective to ensure diversification of portfolio and risk minimization. These internal norms are subject to periodic review and change depending on market conditions and in the interest of the Magnum/Unit holders. Such changes whenever made would be effected without prior notice to the Magnum/Unit holders but would be reflected in the periodic portfolio disclosures sent to Magnum / Unit holders.

Notwithstanding the foregoing investment policies, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities markets or economic or other conditions warrant), the scheme may invest substantially in Indian Government Treasury Bills and or keep cash balances which will be deployed in call markets. The Trustees have the right in their sole discretion, to limit redemptions under certain circumstances.

The committee also invites the Compliance Officer and Head of Research in its meetings. The investment committee holds periodic meetings for a detailed review of investment strategy, portfolio holdings, review of research and dealing activities, analysis of scheme performances and also to ensure adherence to all internal guidelines and processes. The Investment Committee monitors and supervises the investment decisions made by the Investment team and also monitors the risk parameters in each scheme to ensure that the investment limits are properly observed. The risk origination for the investments is done based on the guidelines issued by SEBI and Board of Trustees. Concurrent auditors periodically check the limits and their reports are placed before the Audit Committee, which is comprised of the independent Directors and Trustees. The monitoring of decisions is taken through quarterly secondary and primary market report to the Directors. All the deals, both primary and secondary market are reported periodically to the investment committee and the Board of Trustees.

SBI Dynamic Asset Allocation Fund	To provide investors with an opportunity to invest in a portfolio which is a mix of equity and equity related securities and fixed income instruments. The allocation between fixed income and equity instruments will be managed dynamically so as to provide investors with long term capital appreciation	SBI Dynamic Asset Allocation Fund endeavours to meet the objective of this fund mainly from asset allocation between asset classes. This approach will help reduce the risk of tracking the individual asset classes. Based on historical observation, these asset classes exhibit very different risk - return profile and a low correlation to each other. Both Debt and Equity tend to outperform each other on a relative risk adjusted basis under different market conditions. The fund strategy is based on	<ul style="list-style-type: none"> <li>Equity &amp; Equity related instruments including foreign securities and derivatives - 0% - 100%</li> <li>Debt instruments (including Central and State Government securities, debt derivatives) &amp; Money Market Instruments (including TRIPARTY REPO, Reverse Repo and equivalent) - 0% - 100%</li> </ul>	649.91	20,508

		<p>the persistence of such outperformance over longer periods. The Scheme will allocate higher weight to the asset class that is relatively favourable under the prevailing market and economic conditions. The fund manager will aim for a superior risk adjusted returns over long time periods. The entire approach is rule based and involves a list of checklists and filters to generate buy and sell signals. The key feature of this approach is its design to buy into weakness and to sell into strength.</p> <p>The optimal allocation between Equity, Debt and Cash will be based on three principles:</p> <ul style="list-style-type: none"> <li>• Momentum</li> <li>• Rate of change in momentum</li> <li>• Exhaustion of momentum</li> </ul> <p>1. Momentum: The model assesses the relative strength of momentum for each asset class by examining whether current prices are above or below historical moving average prices for short and medium-term periods. By using a combination of moving averages for different terms, we expect a higher stability and confidence in the momentum indicator. The asset class that shows a higher ratio between current price and the moving average price will get a higher weighting.</p> <p>2. Rate of change: The model uses the rate of change in the momentum of the underlying assets in</p>

		<p>addition to the relative strength of the momentum to mitigate the risk of frequent changes in the signals. For an asset class to be considered strongly trending higher not only does the current price need to be above the moving averages but also the rate of change for the moving averages also need to be positive.</p> <p>3. Exhaustion of momentum: A system based on momentum indicators attempt to identify a trend that is likely to persist and remain strong for a long period. However, even with very strong well-defined trends, there is likely to be a point at which the trend gets exhausted and there will be a reversal in price. The model incorporates the third and essential component of “momentum-exhaustion” which attempts to identify the price and time points at which the probability of a short-term reversal in price trend is quite high. The strategy involves tracking price behaviour and identifying price relationships that typically appear prior to and coincident with market turning points. This framework requires the fund manager to monitor the level, rate of change and pattern of changes in the momentum for these asset classes on a regular basis. Under normal conditions, the fund manager would take the decision to reallocate the funds based on the relative strength of momentum and its rate of change</p>			

Scheme Name	Investment objectives	Investment Strategy	Asset Allocation	AUM (Rs in crores) (as on April 30, 2019)	Folio (as on April 30, 2019)
		<p>for each asset class. However, given the indications of momentum exhaustion reallocation will be based on the contrary stance to the existing momentum signal. In this framework, Fund Manager will use the “momentum-exhaustion” strategy solely on the equity asset class. When either a buy or sell signal is triggered using this strategy, the weight obtained for equity using the Momentum and Rate of change framework will be over-ruled. In other words, under a “Buy” signal, the portfolio will entirely shift to the equity asset class while under the “Sell” signal, the equity weight in the portfolio will be reduced to zero. This will last as long as the buy or sell signal is active. The “momentum-exhaustion” signals will eventually get deactivated either upon realizing a pre-calculated profit target or upon reaching a stop-loss level. Buy and sell signals using the “momentum-exhaustion” strategy is triggered relatively infrequently.</p> <p>sThe frequency of reallocation and portfolio turnover will be maintained under control by allowing small deviation from the target weights suggested by the above strategy. The asset classes will retain market adjusted weights as long as the deviation from targeted weight is below an absolute percentage threshold. The allocation strategy</p>

		<p>of SBI Dynamic Asset Allocation Fund, under certain volatile market conditions, may signal frequent rebalancing of the portfolio in a short period of time.</p> <p>The Scheme will use the derivatives for portfolio rebalancing. Use of derivatives will provide us the ability to follow these frequent signals and efficiently manage the fund. Derivatives on major equity indices are more liquid and less expensive to transact in comparison to selling or buying each individual securities in the portfolio. Derivatives will provide the ability to make larger changes in the allocation without increasing the risk of illiquidity. The exposure to derivatives will be gradually reduced as the market retains a stable trend.</p>

However, there is no guarantee or assurance that the scheme's objective will be achieved. The scheme does not guarantee or assure any returns.	The scheme aims to generate attractive returns through high quality corporate debt securities which are rated AA+ and above. #### Q. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the triparty repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and triparty repo are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on May 06, 2019:

Instruments	Indicative yield range
Overnight rates	5.60%-5.70%
90 day Commercial Paper	7.60%-7.80%
91-day T-bill	6.40%-6.45%
1 year G-Sec	6.50%-6.55%
5 year G - Sec	7.25%-7.30%
10 year G-Sec	7.49%-7.50%
1 year AAA Bond	7.95%-8.00%
5 year AAA Bond	8.05%-8.10%

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally, when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may

impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

#### **R. INVESTMENTS OF AMC IN THE SCHEME**

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

**Swing STP**

Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

**Terms & conditions of Swing STP are as follows:**

1. Source scheme: All open ended schemes (Excluding SBI Magnum Taxgain Scheme and ETF schemes) of SBI Mutual Fund.
2. Target scheme: Growth option in all open ended schemes (Excluding SBI Magnum Taxgain Scheme and ETF schemes) of SBI Mutual Fund.
3. Frequency: Weekly, Monthly and Quarterly intervals. In case the Frequency is not indicated, Monthly frequency shall be treated as the Default Frequency.
4. Dates: The dates of transfers/ default dates shall be as under:

Frequency	Dates of Transfers	Default Date
Weekly Interval	1 <sup>st</sup> , 8 <sup>th</sup> , 15 <sup>th</sup> & 22 <sup>nd</sup> of every month	-
Monthly Interval	1 <sup>st</sup> , 5 <sup>th</sup> , 10 <sup>th</sup> , 15 <sup>th</sup> , 20 <sup>th</sup> , 25 <sup>th</sup> & 30 <sup>th</sup> In case of February last working day)	10 <sup>th</sup> of every month
Quarterly Interval	1 <sup>st</sup> , 5 <sup>th</sup> , 10 <sup>th</sup> , 15 <sup>th</sup> , 20 <sup>th</sup> , 25 <sup>th</sup> & 30 <sup>th</sup> (In case of February last working day) The beginning of the quarter could be any month e.g. January, May, November, etc.	10 <sup>th</sup> of every quarter

In case the date of transfer falls on a non-Business Day, the immediate next Business day will be considered for the purpose of determining the applicability of NAV and processing the transaction.

5. The minimum amount for the first installment shall be as follows:
  - Weekly & Monthly frequency: Rs. 1,000 and in multiples of Re. 1
  - Quarterly frequency: Rs. 3,000 and in multiples of Re. 1

  - Weekly & Monthly frequency: 12
  - Quarterly frequency: 4
7. If there is any other financial transaction (purchase / redemption / switch / SIP / DTP etc.) processed in the target scheme/plan/option during the tenure of Swing STP, the Swing STP will be processed as normal STP for the rest of the installments for the fixed amount.
8. Amount of transfer: The first Swing STP installment will be processed for the installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

(First installment amount X Number of installments including the current installment) - Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer.

In case on the STP date, the amount (as specified above) to be transferred is not available in the source scheme/plan/option in the investor's folio, the residual amount will be transferred to the target scheme/plan/option and Swing STP will be closed. Investors have an option to consider earlier

investments in the target scheme for calculating Swing STP amount.

9. Reverse Transfer: On the date of transfer, if the market value of the investments in the target scheme/plan/option through Swing STP is higher than the target market value (first installment amount X number of installments including the current installment), then a reverse transfer will be effected from the target scheme/plan/option to the source scheme/plan/option to the extent of the difference in the amount, in order to arrive at the target market value.

10. **Top-up option:** Investor can choose Swing STP based on fixed amount installment and additionally investor has an option to choose top-up option. Under this, investor can indicate an absolute amount or percentage (in annualized terms) by which each installment amount will be increased. Amount of transfer will be calculated by taking into consideration of the target market value (including top-up amount) and actual market value of the investments in the target scheme.

a. Amount of transfer: The first Swing STP installment will be processed for the first installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

**In case Top-up amount mentioned as absolute amount:**

Target market value Minus Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer.

Target market value = (Target market value at the time of last installment + First installment amount + (Top-up absolute amount X Number of installments excluding the current installment)).

Minimum amount for Top-up (absolute amount):

- Weekly & Monthly frequency: Rs. 50 per installment and in multiples of Re. 1
- Quarterly frequency: Rs. 100 per installment and in multiples of Re. 1

Target Market Value less Market Value of the investments through Swing STP in the target scheme on the date of transfer.

Target Market Value = (Target market value at the time of last installment + First installment amount + (Target value at the time of last installment X Top-up percentage/ No. of periods))

No. of periods will be considered as below:

- For weekly frequency - 48
- For monthly frequency - 12
- For quarterly frequency - 4

Minimum percentage for Top-up (percentage option): 12% per annum

11. A single STP enrolment Form can be submitted for transfer into one Scheme/Plan/Option only.

12. The redemption/switch-out of units allotted in the target scheme shall be processed on First In First Out (FIFO) basis.

13. The provision of 'Minimum Redemption Amount' as specified in the Scheme Information Document of the source scheme (target scheme in case of Reverse Transfer) and 'Minimum Purchase Amount' specified in the Scheme Information Document of the target scheme (source scheme in case of Reverse Transfer) will not be applicable for Swing STP.

14. The application for enrollment / termination for Swing STP should be submitted at least 10 days before the desired commencement / termination date.

15. In case the Start Date is not mentioned, the application will be registered after expiry of 10 days from submission of the application as per the default date i.e. 10th of each month / quarter (or the immediately succeeding Business Day). ## D. NAV INFORMATION

NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to four decimals as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed as prescribed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on [www.sbimf.com](http://www.sbimf.com) and [www.amfiindia.com](http://www.amfiindia.com).

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI ([www.amfiindia.com](http://www.amfiindia.com)) by 9.00 p.m. on daily basis. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 93% of the NAV and the sale price shall not be higher than 107% of the NAV and the difference between the repurchase price and sale price shall not exceed 7% on the sale price.

### Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

#### **Purchase of mutual fund units:**

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-  
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

#### **Redemption/Re-purchase of mutual fund units**

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment - 1.00%
- b. For exit after 12 months from the date of allotment - Nil.

#### **Scenario 1: Redemption is done during applicability of exit load**

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)  
= Rs. 12 \* (1-1%) = Rs. 11.988/-

#### **Scenario 2: Redemption is done when the exit load is NIL**

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV \* (1 - Exit Load)  
= Rs. 12 \* (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2018/92 dated June 05, 2018.

Padmini Technologies Limited ("PTL"), during the period 2000-2001, which included an inquiry into the investments made by SBI Mutual Fund in the shares of PTL. The Central Bureau of Investigation had also investigated about various aspects of transactions in the shares of PTL which included investments by various schemes of SBI Mutual Fund during the period. A case was subsequently filed in the Sessions Court at Mumbai in 2006 against some ex-employees of the Company. SBI Funds Management Private Limited ("SBIFMPL"), SBI Mutual Fund Trustee Company Pvt. Ltd. and SBI Mutual Fund are not parties to this case. The internal investigations conducted by the Chairman, Board of Trustees, SBI Mutual Fund, however, had ruled out any questionable intentions of SBI Mutual Fund in the matter.

Further, a show cause notice dated January 29, 2010 ("2010 SCN") was received from SEBI in the matter and SBI Mutual Fund has replied to the show cause notice countering the allegations made by SEBI. SBI Mutual Fund had also made an application to SEBI to settle the matter through the consent process, i.e. on a no-fault basis, without accepting or denying guilt. The said consent proposal has not been accepted by SEBI vide its letter dated March 22, 2013. A fresh Show Cause Notice dated May 28, 2013 ("2013 SCN") has been issued enclosing a copy of an enquiry report conducted again by a Designated Authority, recommending a prohibition on SBI Mutual Fund from launching any new mutual fund schemes for a period of 12 months. In terms of the opportunity made available in the 2013 SCN to avail the consent process, SBI Mutual Fund had filed a consent application which was returned by SEBI stating that the consent application by SBIFMPL shall not be reconsidered by SEBI.

Pursuant to Securities and Exchange Board of India (Settlement of Administrative and Civil Proceedings) Regulations, 2014 ("Settlement Regulations"), the Fund house had filed the consent application on March 14, 2017, without admission or denial of guilt, in full and final settlement of all proceedings.
