I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors

a) Mutual funds and securities investments are subject to market risks and there is no assurance or
guarantee that the Fund’s objective will be achieved.

b) As the price / value / interest rates of the securities in which the scheme invests fluctuates, the
value of your investment in the scheme may go up or down

c) Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not guarantee the
future performance of the scheme of the Mutual Fund

d) State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the
operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs
towards setting up of the mutual fund

e) SBI Magnum Taxgain Scheme is only the name of the Scheme and does not, in any manner,
indicate either the quality of the Scheme or its future prospects and returns

f) The NAV of the Schemes’ Units may be affected by change in the general market conditions,
actors and forces affecting capital markets in particular, level of interest rates, various market
related factors and trading volumes

g) The present scheme is not a guaranteed or assured return scheme

h) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement
risk, liquidity risk, default risk including the possible loss of principal

Scheme Specific Risk Factors

a) The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax
consequences that may arise in the event that the scheme is wound up for the reasons and in
the manner provided under the Scheme Information Document & Statement of Additional
Information.

b) In the event of an inordinately large number of redemption requests, or of a restructuring of the
scheme’s investment portfolio, these periods may become significant. In view of the same, the
Trustees have the right in their sole discretion to limit redemptions (including suspending
redemptions) under certain circumstances.

The liquidity of the Scheme’s investments is inherently restricted by trading volumes and
settlement periods.

c) Redemption by the Magnum holder / unit holders due to change in the fundamental attributes of
the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC,
Fund their directors or their employees shall not be liable for any tax consequences that may
arise.

d) The tax benefits described in this Scheme Information Document are as available under the
present taxation laws and are available subject to relevant condition. The information given is
included only for general purpose and is based on advice received by the AMC regarding the law
and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.

e) SBI Magnum Taxgain Scheme will be investing in equity & equity related instruments, debt instruments, and money market instruments (such as call money market, term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme’s investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme’s investment portfolio, these periods may become significant.

f) The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.

g) Stock Lending: There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement. Such failure can result in the possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.

h) Investments under the scheme may also be subject to the following risks:

i. Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.

ii. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

iii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.

iv. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.

v. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

i) Investment in Equity & Equity related investments may also be subject to the following risks:
- Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
- The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

j) Investments in Debt and money market instruments under the scheme may also be subject to the following risks:

- Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

- Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.

- Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.

- Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

- The Scheme may invest in the units of liquid mutual funds. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.

k) Risk factors associated with repo transactions in corporate debt securities:
Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

**RISK CONTROL STRATEGIES:**

Investments in Equity and equity related instruments, debt, money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.

For risk control, the following may be noted:

**Liquidity risks:**

The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

**Interest Rate Risk:**

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable.

**Credit Risks**
Credit risk shall be mitigated by investing in rated papers of the companies having the sound background, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

CREDIT EVALUATION POLICY & DUE DILIGENCE FOR CREDIT RISK

(a) CREDIT EVALUATION POLICY

Credit Analysis is a bottom up approach starting with looking at each individual issuer, industry, terms and covenants of a particular issue, etc. Individual issuer level exposures are taken only after approval from investment committee, i.e. issuer becoming part of “Accepted Credit Universe”. A team of credit analyst will do a detailed analysis and prepare an initiation note to introduce an issuer to the universe.

For every issuer we focus on 4 Cs of credit
➢ Capacity
➢ Character
➢ Collateral
➢ Covenants

Key focus areas are
➢ Management Quality
➢ Financial Analysis
➢ Business Analysis
➢ Industry Analysis
➢ Regulatory Environment
➢ Feedback from Creditors
➢ Other Issues; auditor report and qualifications, etc.

Regular management interaction at various levels, supported by plant visits, interaction with rating agencies is part of the process.

Once a credit limit is set, it is regularly monitored based on internal Tier classification.

DUE DILIGENCE FOR CREDIT RISK

While carrying out due diligence for credit risk, following parameters/attributes are analysed:

➢ Management Quality – It includes assessment of management quality, reviewing promoter background and track record, performance of group companies and possibility of group support, internal control systems, succession plans & repayment track record including that of other companies in the group.

➢ Financial Analysis – It includes analysis of Balance sheet, Profit and Loss account, and cash flow statement. Ratio analysis for the past years including quarterly/half yearly results analysis wherever available. Different set of ratios are analysed for corporates, banks, NBFCs etc.
➢ Business Analysis – It includes understanding of competitive position and competitor analysis on key parameters, strategies for growth, technical and marketing skill set, manufacturing process, productivity details and future expansion plans.

➢ Industry Analysis – It includes assessment of current and estimated demand and supply scenario, Industry structure (fragmentation), End-user analysis of demand, Industry cycles & seasonal factors affecting the business, Entry barriers, threat of import and prospects of exports, Competition from global players, Outlook for key inputs and sensitivity.

➢ Regulatory Environment - It is tracked separately for different industries in terms of Government policies, Impact of changes in taxation policies, other regulatory provisions and impact of them.

B. REQUIREMENT OF THE MINIMUM INVESTOR IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV.

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

II. INFORMATION ABOUT THE SCHEME

SBI Magnum TaxGain Scheme (erstwhile known as (Magnum Taxgain Scheme) commenced its operations from 1st April, 1993. This scheme was launched as a close ended scheme redeeming on 31st March, 2003. The scheme was converted into an open-ended Scheme with effect from 12th November, 1999.

A. TYPE OF THE SCHEME

SBI Magnum TaxGain Scheme is an open ended Equity Linked Saving Scheme with a statutory lock-in period of 3 years and tax benefit.

B. INVESTMENT OBJECTIVE OF THE SCHEME

a) Deliver the benefit of investment in a portfolio of equity shares, while offering deduction on such investments made in the scheme under section 80C of the Income Tax Act, 1961.

(b) Distribute income periodically depending on distributable surplus.

C. SCHEME ASSET ALLOCATION & INVESTMENT STRATEGIES

The broad investment pattern of the scheme will be as follows:

<table>
<thead>
<tr>
<th>Type of Instrument</th>
<th>% of Corpus</th>
<th>Risk Profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equities, Cumulative Convertible Preference Shares, and Fully Convertible Debentures (FCDs) &amp; Bonds*</td>
<td>80-100</td>
<td>Medium</td>
</tr>
<tr>
<td>Money Market Instruments **</td>
<td>0-20</td>
<td>Low</td>
</tr>
</tbody>
</table>

* Investment shall also be made in Partly Convertible Debentures (PCDs) and bonds including those issued on rights basis subject to the condition that as far as possible the non-convertible portion of the debentures so acquired or subscribed shall be divested within a period of 12 months. The balance funds shall be invested in short term money market instruments or other liquid instruments or both. The investment process as above will be completed within six months. In the interim period the funds will be invested in short term money market instruments or other liquid instruments or both. After 6 months from the closure of the scheme, the fund may invest an amount not exceeding 15% of the resources mobilised in money market and other liquid instruments could go upto 20% of the net assets of the scheme.

** Money Market Instruments will include Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, short term bank deposits, short-term Government securities (of maturities less than 1 year) and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.

The Scheme may invest in derivatives (equity as well as debt) and Securitized Debt, as and when, permitted by ELSS /SEBI Guidelines.

The investments may be made in primary as well as secondary markets. The portfolio will be sufficiently diversified so as to reduce the risk of underperformance due to unexpected security...
specific factors. If allowed in future, the fund may invest in foreign equities (subject to relevant RBI guidelines and subject to RBI approval).

Investment in FCDs & PCDs will be in securities rated as investment grade by a credit rating agency authorised to carry out such activity under the SEBI Act, 1992. In case a debt instrument is not rated, Mutual Funds may constitute committees who can approve such proposals for investments in unrated instruments subject to the approval of the detailed parameters for such investments by the Board of Directors of SBIFMPL and SBIMFTCPL. The Scheme being open-ended, some portion of the portfolio will be invested in highly liquid money market instruments or government paper so as to meet the normal repurchase requirements. The remaining investments will be made in securities which are either expected to be reasonably liquid or of varying maturities. However, the NAV of the Scheme may be impacted if the securities invested in are rendered illiquid after investment.

The above investment pattern is indicative. The fund manager may change this on defensive considerations, and such changes shall be for short period. The funds raised under the scheme shall be invested only in transferable securities as per SEBI Regulations, 1996.

D. TYPE OF THE INSTRUMENTS IN WHICH SCHEME WILL INVEST

Equities, Cumulative Convertible Preference Shares, and Fully Convertible Debentures (FCDs), Bonds, Money Market Instruments & repo in corporate debt.

E. PORTFOLIO TURNOVER

The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, given the nature of the Scheme which follows a monthly cycle or rollover / positions the portfolio turnover is expected to be high. Further, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in equities, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

Portfolio Turnover Ratio as on March 31, 2019: 0.54

M. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the triparty repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and TRIPARTY REPO are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD’s and CP’s are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment ) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on April 08, 2019:
The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally, when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP’s and CD’s which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

N. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Scheme Information Document (SID), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

O. INVESTMENTS IN OTHER SCHEMES

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996:

"A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investments made by all schemes under the same management or in scheme under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund."

P. PROCEDURES FOLLOWED FOR INVESTMENT DECISIONS

The investment policy manual defines the broad guidelines for investments by various funds. Fund managers invest based on the offer document limits, regulatory limits and internal guidelines as set out in the Investment policy manual. Fund managers take input from the research team. The Head of Research will be heading the research team and will be responsible
for the research output and performance. The transactions relating to the investments will be
carried out by separate Debt and Equity Dealers. The processes and risks in the Investment
activities will be monitored through a senior functionary reporting to the CIO. Investment
committee is playing the role of governance and supervisory body for all investment related
activities. The committee will hold a meeting on a periodic basis for a detailed review of portfolio
holdings, scheme performance and investment strategy and also to ensure adherence to all
internal processes. The Investment Committee monitors and supervises the investment
decisions made by the Investment team and also monitors the risk parameters in each scheme
to ensure that the investment limits are properly observed. The risk origination for the
investments is done based on the guidelines issued by SEBI and Board of Trustees. Concurrent
auditors periodically check the limits and their reports are placed before the Audit Committee,
which is comprised of the independent Directors and Trustees.

Q. STOCK LENDING

The scheme may also engage in stock lending. Stock lending means the lending of stock to
another person or entity for a fixed period of time, at a negotiated compensation. The securities
lent will be returned by the borrower on expiry of the stipulated period. The Fund may in future
carry out stock-lending activity under the scheme, in order to augment its income. Stock lending
may involve risk of default on part of the borrower. However, this risk will be substantially
reduced as the Fund has opted for the "Principal Lender Scheme of Stock Lending", where entire
risk of borrower's default rests with approved intermediary and not with the Fund. There may also
be risks associated with Stock Lending such as liquidity and other market risks. Any stock
lending done by the scheme shall be in accordance with any Regulations or guidelines regarding
the same. The AMC will apply the following limits, should it desire to engage in Stock Lending:

(a) Not more than 20% of the net assets can generally be deployed in Stock Lending
(b) Not more than 5% of the net assets can generally be deployed in Stock Lending to any single
counter party.

R. UNDERWRITING

The Scheme may take up underwriting of the securities of other issuers subject to the relevant
SEBI Regulations and as may be permitted by the Board of Directors of the AMC. Regulation 46
states that:

“Mutual Funds may enter into underwriting agreement after obtaining a certificate of registration
in terms of the SEBI (Underwriters) Rules and SEBI (Underwriters) Regulations, 1993
authorizing it to carry on activities as underwriters.

1) For the purpose of these regulations, the underwriting obligation will be deemed as if the
investments are made in such securities.
2) The capital adequacy norms for the purpose of underwriting shall be the net assets of the
scheme. Provided that the underwriting obligation of a Mutual Fund shall not at any time exceed
the total net asset value of the scheme”

S. How this scheme is different from the existing schemes of SBI Mutual Fund:

The prime objective of scheme is to deliver the benefit of investment in a portfolio of equity shares,
while offering deduction on such investment made in the scheme under section 80C of the Income-tax
Act, 1961. It also seeks to distribute income periodically depending on distributable surplus.
Investments in this scheme would be subject to a statutory lock-in of 3 years from the date of allotment to avail Section 80C benefits. The details of other Schemes offered by SBI Mutual Fund is as follows:

D. COMPUTATION OF NAV
NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off four decimals as follows or such other formula as may be prescribed by SEBI from time to time:

\[
\text{NAV} = \frac{\text{Market or Fair Value of Scheme’s investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}
\]

NAV will be disclosed as prescribed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 9.00 p.m. on every business day basis. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 93% of the NAV and the sale price shall not be higher than 107% of the NAV and the difference between the repurchase price and sale price shall not exceed 7% on the sale price.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let’s assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.
Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

a. For exit on or before 12 months from the date of allotment – 1.00%
   b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019: say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
   = Rs. 12 * (1-1%) = Rs. 11.988/-

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
   = Rs. 12 * (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2018/92 dated June 05, 2018.
